Hi Roelof,
Weird indeed! Mike catching Bangkok and Frans catching San Juan.Recently Carlo in Italy logged T/A as well.It's as if propagation is preferencing the more southern areas of Europe.SILSO SSN are on the way down, maybe this is the turning point?
Regards - Dirk

Hello Frans,

Yes, this will certainly be from NMR, San Juan, PTR.
Albeit the assigned timeslot runs from 03:00 UTC to 03;10 UTC, most of the times the string of messages will last more than 30 minutes.

Weird enough, I did not receive anything at all from NMR last night!

Hi Chris,

My PC operating system is Windows Vista Home edition, quite ordinary. You have the other info.
Good luck.

Regards,
Mike, g3gms

Hi all,
The March 7 Baku log has somehow escaped me the day earlier.
Cyprus Turkish radio using the E-identifier from Samsun, and the official Cyprus Radio accusing Antalya again. :0)
I have severe doubts about the Svalbard logging. I suspect this was Bodo transmitting in the wrong time slot (and interfering with Corsen) . This has happened before.Anyone got more?

Regards - Dirk

2015-03-09 04:03:19> NNNN
```

Your message is preceded my an other one from Norway.
This line: <<2015-03-09 04:02:44> ~QUBZC~C -4~7>>
shows ZC~C -4~7; -4 in reverse mode is AR just like your header.
Unfortunately the upper limit of my PERSEUS recording is 430 khz, so
I can't check it out.

73,
Roelof

Foristell, Missouri
Interesting to see $12C push out $04C this morning, usually the other
way around.
Chile still regular, get it while you can.

Hello Dirk,

Further to the Svalbard issue, these two messages were transmitted by Bodo. The second is the one flagged as Svalbard in the 04:00 UTC time slot.

Though not impossible it seems weird that Svalbard is transmitting a message that applies to Myra, which is located in the Lofoten Islands, west of Narvik.

```

From: Dirk Claessens
Topic: 9722 Message: 9729

Hi Roelof,
Thanks for the update.Another thing I should have spotted is that in my logging, coordinates 68N 15E are mentioned.This is very close to Bodo and to far south for Svalbard.
Regards - Dirk

Subject: Re: [navtexdx] Navtex log from Antwerp, BEL 20150309

Hello Dirk,

Further to the Svalbard issue, these two messages were transmitted by Bodo. The second is the one flagged as Svalbard in the 04:00 UTC time slot.

Though not impossible it seems weird that Svalbard is transmitting a message that applies to Myra, which is located in the Lofoten Islands, west of Narvik.

9731. Navtex log from Whitley Bay

Yahoo group: navtexdx (2015)
Date: 2015-03-10 09:49:21 UTC
From: Mike Thayne
Topic: 5635 Message: 9731

Hello All,

Logs from last night over 1500km.
I wonder if EJM Malin missed the regular time slot at 0240utc because PBK was a little late clearing the channel from the 0230utc slot, thus allowing VCO Sydney to have a clear run?

Regards,
Mike, g3gms

From: david
Topic: 9398 Message: 9732

Conditions improved last night. Still a long way for my station to go, but the improvement was welcome.

9733. Technical YaND question

Yahoo group: navtexdx (2015)
Date: 2015-03-10 11:20:59 UTC
From: david
Topic: 9733 Message: 9733

Hi all,

I noticed that the 0730 $01V Oostende transmission does not appear in the YaND Navtex Schedule (and therefore not in the Message Time Slot bar). It is hardly the end of the world, I know, but I wondered if it was possible for a user to edit the base data of the table so that I could put it in?

Best Wishes
David GM8XBZ

9734. Is Norway rolling back services?

Yahoo group: navtexdx (2015)
Date: 2015-03-10 11:39:26 UTC
From: david
Topic: 9734 Message: 9734

Hi all,

Last night, the Norwegian Navtex stations carried the following message. This one was from Vardo, but other stations had it too.

```
2015-03-10 00:26:50> ZCZC CE82
2015-03-10 00:26:54> 0~2200 UTC MAR 15

```

Although it not 'The end of Navtex as we know it', it will remove a useful, regular, lengthy transmission for us to use, as well as reducing the service to maritime users. Is this part of a trend, to expect all sailing vessels to be connected to the Internet? I'm willing to admit I am frequently behind the curve on these matters, so I have to ask if other authorities are pulling back broadcast services, too.

Best Wishes

David

9735. Re: [navtexdx] Navtex log from Whitley Bay

Yahoo group: navtexdx (2015)
Date: 2015-03-10 11:40:29 UTC
From: roelof@...
Topic: 5635 Message: 9735

Hello Mike,

It is hard to tell, as the Dutch Coastguard transmission from the previous timeslot lasted until 02:41 UTC. It was followed by the end of a transmission from Split, which was very short.
Immediately, VCO kicked in with a signal 8 dB over the band noise. Toward the end this increased to 13 dB.

I found 8 messages from VCO of which the last five were perfect decodes!

This also shows once more the strange way propagation behaves!

Daily log:

From: Dirk Claessens
Topic: 9733 Message: 9738

Hi David,
If 01V Ostend is not showing up in the schedule, then it must somehow have dissapeared from the station database. You can download an update file from the link below:

https://groups.yahoo.com/neo/groups/navtexdx/files/Navtex%20Software/YAND%20Navtex%20%20Decoder/

You need yand_stations.txt. Note that you must download the file and store it in the Yand directory.(see the readme file for full instructions, it's a simple procedure)
Regarding your question about the Norwegian weather reports being available on the internet, I can only guess that the northerly sea areas Vardo is covering for are mostly traversed by ships fully equipped with sattelite links, giving far better and complete weather data than a lengthy text-only Navtex message can provide.

I'm pretty sure Navtex is not on it's way down, on the contrary, the network is constantly being expanded. Below is a link to the IHO WWNWS Navtex board. See the "documents" links down the page for the yearly meeting/progress reports. Lots of boring administrative stuff, but interesting at times.
Regards - Dirk

Subject: [navtexdx] Technical YaND question

Hi all,

I noticed that the 0730 $01V Oostende transmission does not appear in the YaND Navtex Schedule (and therefore not in the Message Time Slot bar). It is hardly the end of the world, I know, but I wondered if it was possible for a user to edit the base data of the table so that I could put it in?

Best Wishes
David GM8XBZ

9739. RE: [navtexdx] Norway

Hi Dirk,

Thank you for the link. As you suggest, a lot of information. I'll start reading.
I'm sure Navtex will expand in some form -- probably NavDat -- but the simpler stuff that only really helps small craft seems to be being pushed way down the list. Disappointing, as they are the ones who keep getting into difficulties because they know no better.
The only bright side to this, is that it keeps my local lifeboat busy. That is about the sum of VHF activity we can monitor out here.
Back to the books

9741. Von St Johns CAN ?

Yahoo group: navtexdx (2015)
Date: 2015-03-10 15:47:20 UTC
From: stephen_qrp@...
Topic: 9741 Message: 9741

Hello

YaND identified this message as Von St Johns CAN but given the time slot I am not at all sure.

However being issued by the environment department of Canada and refering to Belle Isle and Port Au Port makes it a possibility.

Did any one else catch this transmission ?

Regards to all

Stephen

Hello Stephen,
Perfect decoding quality, this is VON.Messages deemed urgent by the operator can be transmitted at any time.Not the slightest sign of VON here at that time.
Regards - Dirk

Foristell, Missouri
Dick Palmer W7KAM
Boston up to its old habits of broadcasting news from Hawaii, New Orleans and California
instead of near Boston. Mixing with $04G at 0100 and then back to $04F at 0102.
Not sure what to make out of this transmission IDed as $04V. ID probably an example of
operator error from $04Q of Sydney, Nova Scotia? This happened at least one other
time on 01 Jan 2014 at 0735. $04V should only be on 490 kHz in French. RNA (490) lists transmission
as Fundy, New Brunswick but coming from Yarmouth, Nova Scotia to further confuse this issue.

2015-04-11 0059 518 $04F Boston, Massachusetts
2015-03-11 0243 518 $04V?? St. John, Nova Scotia
2015-03-11 0243 518 $04Q Sydney, Nova Scotia
2015-03-11 0349 518 $04X Labrador, Newfoundland/Labrador

From: Dirk Claessens
Topic: 3028 Message: 9749

Hello Dick,
The V/Q mixup is clearly an operator error.The VA34 message ends with NOTSHIP SYDNEY, and then seamlessly (without any time gap) starts with QA32.On 490, I have 04V listed as VAR-3 Yarmouth,CAN in the 03:30 time slot.Quite rare here, last logged in 2013, and indeed in French.
Regards - Dirk

Subject: [navtexdx] NA-Log from Foristell, MO

Foristell, MissouriDick Palmer W7KAM Boston up to its old habits of broadcasting news from Hawaii, New Orleans and Californiainstead of near Boston. Mixing with $04G at 0100 and then back to $04F at 0102. Not sure what to make out of this transmission IDed as $04V. ID probably an example of operator error from $04Q of Sydney, Nova Scotia?
This happened at least one other time on 01 Jan 2014 at 0735. $04V should only be on 490 kHz in French. RNA (490) lists transmissionas Fundy, New Brunswick but coming from Yarmouth, Nova Scotia to further confuse this issue.

Thanks to Dirk and Roelof we can say for sure that $04V on 518 was either an operator
error or a failure of SeaTTY to decode the transmission correctly.

(RNA Navtex editor please delete any reference of this reception report in the data base.)

Hi Roelof,

A very illustrative example of Navtex' far from perfect error detection...

Regards - Dirk

Hello all,

Only Puorto Rico showed up as T/A, however excellent decodes from
the Atlantic Islands were found on 490 and 518 kHz.

Hello all,

NAVTEX 490 kHz log over 1500 km:

9759. Navtex Logs from W Scotland

Yahoo group: navtexdx (2015)
Date: 2015-03-12 18:38:43 UTC
From: david
Topic: 9398 Message: 9759

A later report than usual, as I had to get more supplies from the Builder's Merchant (250k round-trip) in order to maintain the pace of the renovations and domestic harmony. Absolutely foul weather, so it took most of the day. The weather didn't seem to deter signals from the Spanish Islands, though, with streams of messages from them. As usual, I will only report the first of each bundle of messages from a scheduled slot.

Session Report for David Atkins, GM8XBZ

9762. Yokohama (11I) on 518

Yahoo group: navtexdx (2015)
Date: 2015-03-13 01:56:36 UTC
From: Mark Ku7z
Topic: 9762 Message: 9762

Hi to all! I was just reviewing my Seatty Logs from the last several days and much to my surprise Yokohama, Japan was attempting to be heard this morning, on 518 starting at 1320 utc! Last time I copied Japan this late in the season was 5 years ago! Amazing! Almost as magical as the six meter band! Here is the raw log of the 5 messages.

73, Mark, Ku7z

9766. NA-Log from Foristell, MO 3/13

Yahoo group: navtexdx (2015)
Date: 2015-03-13 15:41:00 UTC
From: PalmerRD@...
Topic: 9766 Message: 9766

Foristell, Missouri
Friday the 13th was very good to me. I finally logged $15L from the end of South America
for my final $15 station. My 75th Navtex station. Somewhat strange as none of the other
Chile stations were logged last night. Hope these conditions hold up for the upcoming CLE.

Hi Dick....congrats on your Chile decode! I just came from Google Maps distance calculator where I
found that you are almost 600 miles south-west of my QTH. That sure makes for quite a difference
in the stations that we log on a given night. I was quite thrilled to see that I'd logged both St. Johns,
NL and Greenland, as well as Astoria, OR overnight. To have a good path both east and west of
here at roughly the same time is rare!

73, Bruce, VE3EAR

Hello Dick,
Amazing DX, congratulations!Here in Europe, South-African stations (Durban, Cape Town ~9500km) have never been logged on REU, the path is 90% over land.
Foristell - Magalanes is on a path mainly over sea, that has to be the reason I guess.But it remains amazing!

Best regards - Dirk

An awful lot of fractional decodes made it difficult to claim many stations.
Lots of powerful locals, of course. These are the only ones that survived
the cut:-

From: Dirk Claessens
Topic: 9776 Message: 9777

Hi Stephen,
Install the latest yand_stations.txt from the file section of the group.Callsign Baku is UBJ, this was added a few months ago.
Regards - Dirk

Subject: [navtexdx] ??? Baku,AZR

  Hello

I find myself asking for help again in identifying a station.
YaND said this message was from BAKU with ???

??? Baku,AZR2015-03-14 01:37:48> ZCZC RB56
2015-03-14 01:37:50> BAKU NATIONAL CENTER
2015-03-14 01:37:54> ISSUED BY THE MET OFFICE
2015-03-14 01:37:58> AT 0135 UTC 14 MAR 15
2015-03-14 01:38:02> GALE WARNING N.42
2015-03-14 01:38:02>
2015-03-14 01:38:12> IN THE NEXT 1-3 HRS IN AREA 21190 EXP INCR NW-N 12-17 M/S SEAS
2015-03-14 01:38:14> 1,5-2,0 M
2015-03-14 01:38:16> UNNNN

Message out of time slot but seems genuine, did any else pick this up please.
Regards to all
Stephen

Thanks Dirk

Are you saying this is not BAKU ?

I thought I was using the most uptodate version of the stations file (but not yet the version you posted on 11th March) The version I am using is version 5 but I see the very latested version is also version 5.

Would it be possible to have incrementing version numbers ? say 5.1 / 5.2 or similar to avoid confusion.

Kind regards

Stephen

9780. Navtex log from Tuscany Coast 14-15/03

Yahoo group: navtexdx (2015)
Date: 2015-03-15 09:09:07 UTC
From: Roberto Rizzardi
Topic: 9780 Message: 9780

Hi all,
I come back after many weeks of absence due to the repair of my receiver IC R-71.
Here the log no filtered.
A question: is Split Radio relayed from Mondolfo Radio as you can see in the message below?

Report from : Roberto Rizzardi
QTH : Porto Santo Srefano (GR), Italy
Locator : JN52nk
Receiver : IC-R71E
Antenna : 75 cm side square MW tunable loop
Extra : Grahn GS2 controller
Decoder : YaND 6.4

From: Dirk Claessens
Topic: 9780 Message: 9781

Hello Roberto,
Yes, Mondolfo is relaying for Split for quite some time now.Depending on message content, Yand may come up with a wrong ID.
Regards - Dirk

Subject: [navtexdx] Navtex log from Tuscany Coast 14-15/03

Hi all,
I come back after many weeks of absence due to the repair of my receiver IC R-71.
Here the log no filtered.
A question: is Split Radio relayed from Mondolfo Radio as you can see in the message below?

9782. Re: [navtexdx] ??? Baku,AZR

Yahoo group: navtexdx (2015)
Date: 2015-03-15 09:42:46 UTC
From: Dirk Claessens
Topic: 9776 Message: 9782

Hi Stephen,
What you logged was surely Baku. (Most messages will have a line "Baku National Center")
There have been some updates lately, for missing/wrong Ostend time slots in the schedule.I'm quite sure Baku's callsign was added more than 6 months ago.
The version number identifies the format version of the file, not the update serial number.This is a leftover from a major format change some years ago, to prevent the use of older formats.Sorry for the confusion.
Regards - Dirk

Subject: Re: [navtexdx] ??? Baku,AZR

  Thanks Dirk

Are you saying this is not BAKU ?

I thought I was using the most uptodate version of the stations file (but not yet the version you posted on 11th March) The version I am using is version 5 but I see the very latested version is also version 5.

Would it be possible to have incrementing version numbers ? say 5.1 / 5.2 or similar to avoid confusion.

Kind regards

Stephen

Hi all,
An 8-minute strong opening from Sydney, due to the direct effect of the C9 flare peaking at 02:13 UTC? (See solarham.net)

Thank you Dirk

Station list now correct as at the 11th March posting

Do you please have the raw message for 20150315 0426 518 $04C VCK Sept-Iles,CAN
My log shows 04:26:47 ZCZC ~~A317 NOTSHIP Q170~ plus other garbled fragments.

Thanks Stephen

9790. Re: ??? Baku,AZR

Yahoo group: navtexdx (2015)
Date: 2015-03-15 15:03:18 UTC
From: stephen_qrp@...
Topic: 9776 Message: 9790

Thank you Roelof

The very garbled message I received had enough words that match you message together with the time stamp to confirm I did indeed capture (badly) VCK Sept-Iles,CAN.

Kind regards

Stephen

Topic: 9795 Message: 9795

After last week's San Juan, today tecond Trans Atlantic log ever: Sydney. First time for me to receive Sydney, CAN. Decodes are far from flawless, but I could identify Sydney with Mike Thayne's report easily.
It looks like my LZ1AQ loop antenna, built with the fantastic help of Roelof is finally showing
the results hoped for!

Report from: Frans Vink
QTH : 43 36 N 7 00 E

From: roelof@...
Topic: 6159 Message: 9796

Hello Mike,

I received the same long string of messages from VCO on 518 kHz and also four messages on 490 kHz. Apparently the channel is free when propagation peaks!
There was also good T/A progation on 630M (474.2 kHz) WSPR last night.

Daily log:

NAVTEX 490 kHz log over 1500 km:

Hello Frans,

Congratulations on catching VCO last night.
Did you receive at the same time other stations on your two other receivers / antennas?

73,
Roelof Bakker

Hi Roelof,

No, not the slightest sign of VCO on the mini whip nor the M0AYF. It looks like the LZ1AQ is slightly more performant, as you predicted!

Groeten,

Frans

Hello Frans,

Reception on loops and (mini) whips 100% identical.
The factor that makes a difference is susceptibility to local noise present at a particular location.

So, I gather that the noise floor on your mini-whip is higher than on the LZ1AQ loop.

At my location, the reverse is true!
Regarding antennas for LF, the best antenna is the antenna with the lowest noise floor!

73,
Roelof

9802. NA-Log from Foristell, MO 3/16

Yahoo group: navtexdx (2015)
Date: 2015-03-16 14:31:04 UTC
From: PalmerRD@...
Topic: 9802 Message: 9802

Foristell, Missouri
A rather good night with 20 different stations logged. $15L made only
it's second
appearance since I have been recording these signals.

2015-03-16 0220 518 $04N Portsmouth, Virginia
2015-03-16 0242 518 $04Q Sydney, Nova Scotia

9803. Re: [navtexdx] Navtex logs from Whitley Bay, ENG

Yahoo group: navtexdx (2015)
Date: 2015-03-16 15:02:58 UTC
From: Mike Thayne
Topic: 6159 Message: 9803

Hello Roelof,

Yes, I am blessed when $01Q EJM fails to make an appearance, probably due to $03 9AS from Mondolfo Radio starting early and thereby kicking in the "inhibit" transmission control at EJM. So my local pest gets the chop and I get the benefit, when propagation conditions are good, to receive VCO.

I also got fragments from NMN and NMR but not sufficient to make a log claim.

Regards,
Mike, g3gms

Topic: 9398 Message: 9807

Hi All,

Quite the worst night for reception so far this year. Large numbers of transmissions were garbled, mostly in the crucial areas that allow accurate identification. These few over 1200km made the cut.

Hello all,

last night at 06:00 UTC after a steep rise, the Kyoto Dst peaked at
+45. In the next 4 hours it dropped to -84.
This does not bode well for the coming days!

Daily log:

NAVTEX 490 kHz log over 1500 km:

```
20150316 2142 490 $01K TFA Grindavik,ISL 2045

From: " Vernon "
Topic: 8505 Message: 9812

Some TA's from last night. Nothing from South America other than 3
scrambled message partials from Puerto Montt Radio. Will leave on the
N/S Wellbrook Loop for tonight.

Hi All,

Marginal improvements in reception, but the antenna has to relocate to a quieter corner. Until then,

From: roelof@...
Topic: 5534 Message: 9819

Hello all,

Mike, I also found 8 messages from SUZ and not a single shred of T/A decodes. Nothing at the all from Bodo and Vardo either.

The Boulder A is now 117 and the Kiel A is 88.
I gather it will take two to three weeks before conditions will recover.

Daily log:

NAVTEX 490 kHz log over 1500 km:

From: Mike Thayne
Topic: 5534 Message: 9820

Hello All,

Roelof, Yes pretty gloomy prospects but let us hope it will clear up before
or during the forth coming CLE at the end of month.
Vincent Schriel in Rotterdam did well in receiving a long message from VON
St John, out of time slot, so something was going on in the layers above us.

73,
Mike, g3gms

9821. Navtex log from Antwerp,BEL 20150318

Yahoo group: navtexdx (2015)
Date: 2015-03-18 19:59:47 UTC
From: Dirk Claessens
Topic: 9821 Message: 9821

Hi all,
Daily log over 1500km.With the loop pointing north, absolutely nothing from Bodo and Vardo, even Orlandet (@1400km) was completely absent. Grindavik made it on 490, but with horrible decoding quality.Grindavik on 518 was only logged in the 03:50 time slot.And it's not over yet...
Regards - Dirk

9823. Navtex CLE192 - EARLY ADVICE

Yahoo group: navtexdx (2015)
Date: 2015-03-19 09:23:15 UTC
From: Brian Keyte
Topic: 9823 Message: 9823

Hi all

Our seventh Navtex Co-ordinated Listening Event will soon be here.
The sixth Navtex Event (CLE168) was in March 2013.
Many NDB List members have 'discovered' the NAVTEX mode from our
earlier CLEs and found it fascinating. Any NavtexDX members who
haven't taken part in a CLE before can discover the value of comparing
their results with the rest of us - in a constructive, non-competitive way!

Days: Friday 27 March - Tuesday 31 March
Times: Start and end at midday, your local time
QRG: 490kHz and 518 kHz (no other frequencies please)

We are adding the extra 24 hours at the end, to help us to cover
the two frequencies adequately.

Newcomers to Navtex are very welcome to join in - my simple Introduction
to get you started is below. For the much better FULL DETAILS AND ADVICE
go to our info page (http://www.ndblist.info/) and select the box to visit
the Datamodes Section or direct to http://www.ndblist.info/datamodes.htm
All the Navtex information is in the lower part there:
Details are given of several good decoders which are freely available
including Dirk's excellent YaND and the SeaTTY decoder which can
be used without charge for a 30-day trial period. Members' Navtex
reports are included in REU/RNA/RWW, also reached via
http://www.ndblist.info/

This advice is a bit early to give extra time to prepare for decoding.
Please look out for the Final Details about three days before the CLE
starts. It will include important advice about log making, etc.

This Listening Event is for the NDB List AND the NavtexDX List.
The advice is going to both Lists, and so will my 'Final Details' and the
Combined Results after the event, etc.
If you are a Member of NavtexDX, please continue to post to that list.
If you are ONLY a Member of NDB List please post any NAVTEX CLE logs
to NDB List (including any trial sessions before the CLE).

Whichever List(s) you belong to, do give the event a try.

Good Navtexing
Brian

NAVTEX - A SIMPLE INTRODUCTION

The worldwide NAVTEX system transmits navigational and meteorological warnings and forecasts and urgent marine safety information to ships. It provides a fascinating variation on our hobby, needing all the usual skills with receivers and aerials and knowledge of different propagation conditions, but adding some good DX reception, interesting navigational messages and the ability to leave your receiver and PC 'listening all night' while you are fast asleep! These short notes are just intended to GET YOU STARTED, taking some of the initial mystery out of Navtex and Decoding, explaining as simply as possible how to receive your first stations, how to identify them and how to report your loggings.

1. TUNING TO A NAVTEX SIGNAL Set your receiver to show 516.30 kHz on the dial for 518 kHz (or 488.3 for 490 kHz) with USB setting and a wide filter, such as 2 kHz (Or, with CW setting, set your receiver to the actual Navtex frequency and the BFO to +1.7 kHz).
You should occasionally hear the background noise replaced by the warbling sounds of a Navtex signal.

2. GETTING SIGNALS TO YOUR PC Make an audio connection from the receiver to the PC sound card input. It's best to use the more professional advice about how to do that, but I just take a length of co-ax from the two terminals of one side of some primitive headphones direct to the PC's line input socket. You should be able to hear the signal in the speakers by adjusting the PC volume control settings (playback and/or recording). If necessary you could use the microphone input socket, but it is important to AVOID OVERLOAD which could damage the sound card.

3. INSTALLING A DECODER PROGRAM A decoder program (see the Navtex section in the Website) is easily installed in your PC - just follow the advice. When you have succeeded with your first decodes we recommend using YaND, which has many features designed specially for our needs.

As a very simple 'starter' though, I recommend the free Frisnit decoder. Go to http://www.frisnit.com/navtex/ and in Downloads select NAVTEX decoder (PC). Just save the 'navtex.exe' file, then double click on it. With a 1700 Hz setting on the display, in no time you will see the incoming messages.

Then move on to Dirk's YaND, which identifies the received Stations for you, helps you to set up your log in the right format for REU/RNA, etc. and has many extra features.
Alternatively, SeaTTY is also a very good decoder with some extra features. It is quite easy to install and use and its 30-day trial is free of charge.

4. RECOGNISING THE STATIONS You will find that most Navtex messages start with 'ZCZC' and end with NNNN. The ZCZC is followed by two letters and two numbers - e.g. OA12. The first letter gives you a good idea which Station you have received and it tells you the times of day, 4 hours apart, when that station is likely to transmit. Most of the 'O' stations transmit starting at 02:20, then 06:20, 10:20, etc. The World is split into Navtex areas and there is often only one Navtex station using each letter in each

area. In North West Europe (Area 01) an 'O' station heard on 518 kHz is likely to be Portpatrick in Scotland, but it might be from Malta (Area 03) or even St Johns, Newfoundland (in Area 04). The actual messages should remove any doubt about which of the possible stations it is - the messages may include the Station Name (e.g. 'MALTA RADIO'), or the Navtex Area Number or geographical references, latitude/longitude, etc.
The second letter (A) shows what kind of message it is and the rest provides a message number.

5. STATION IDENTS We use our own way of identifying each station in our logs and station lists. It always starts with a '$' which means 'this is a Navtex Station' and it allows us to include these stations in lists with the other kinds of beacons in the Rxx database, etc. Immediately after the $ comes the two-digit Area Number (most of the eastern part of N.America is area 04). Last comes the Station Letter - an important part which provides the main 'key' to the station sending the message. So the 'O' station above would be $01O if Portpatrick, $03O if Malta and $04O if St Johns. You can find lists of the Navtex stations and the times they transmit in Rxx and from Alan's World Database in the Navtex Section of the Website.

YaND automatically works out for you everything in 4. and 5. above!

IMPORTANT: However, WHICHEVER decoder you use it is important to CHECK ALL YOUR LOG ENTRIES. Make sure that each decoded message shows the as-transmitted Station letter and that each message contains text confirming the identity of the Station you are showing.

6. OVER TO YOU! You can sit and watch the messages arriving or just leave your receiver and decoder program running overnight, then look through the messages afterwards to see what you have caught.

Enjoy!

Hello Mike,

>>> Vincent Schriel in Rotterdam did well in receiving a long message from VON St John, out of time slot, so something was going on in the layers above us. <<<

That was in a log from the night before the geomagnetic storm.
The Kyoto Dst has moved fast from -228 to about -90 and is now slowly recovering.
This will take some time, I'm afraid!

73,
Roelof

From: david
Topic: 9826 Message: 9826

Hello All,

Because we don't generally report local stations, it has taken me some time to stumble upon this one.
490kHz 01C Portpatrick is only listed in two slots every day, 0820 and 2020. I have seen a note somewhere that lists just theses two broadcasts but, as a very local listener, I know that the 0020 slot is used daily to send a lengthy weather report and forecast. It is about 8 minutes long, so might be helpful for listeners wishing to add the station to the log. The station also makes a lengthy transmission at 1220.

Similarly, 490kHz 01U Cullercoats is only listed in the List for two sessions [0720 and 1920], but is regularly heard in other 'U' transmission slots. There could well be other stations to which this applies.

I'm sure there must be a historical reason behind this, but I have been unable to trace any formal documentation on stations only transmitting in reduced numbers of slots. Of course, the waters are muddied by the requirement for Navtex stations to make transmissions at any time when necessary. However, with a Navtex CLE coming up, would it be a good time to check the scheduled outputs of all coastal stations?

Best Wishes,
David GM8XBZ

Hello All,

Logs from last night over 1500km. Pleased that I caught a string of 6 from
UJB Astrakhan so there is always hope of something unexpected!
Roelof, whoops I never thought to look at the dates in Vincent's log!!

Best regards,
Mike Thayne, g3gms

Location: Whitley Bay, England, IO95gb
Receiver: Icom IC735 in CW mode 500hz
Decoder: YaND 6_3D.
Computer: Dual CPU 2.2Ghz, RAM 2.00GB
with external soundcard.
Antenna: Wellbrook ALA100LN with 10m wire
loop (2x3m, 2x2m).

Hello David,
The time slots in Yand's database only mention the fixed daily Inshore Waters Forecasts.The other slots may or may not be used: "Weather Actual Reports are broadcast once only at the next available broadcast schedule"
I have attached a copy of the MCA document where I found this info.Maybe this is useful.

Regards - Dirk

Subject: [navtexdx] Another YAND_STATIONS.TXT question

Hello All,

Because we don't generally report local stations, it has taken me some time to stumble upon this one.
490kHz 01C Portpatrick is only listed in two slots every day, 0820 and 2020. I have seen a note somewhere that lists just theses two broadcasts but, as a very local listener, I know that the 0020 slot is used daily to send a lengthy weather report and forecast. It is about 8 minutes long, so might be helpful for listeners wishing to add the station to the log. The station also makes a lengthy transmission at 1220.

Similarly, 490kHz 01U Cullercoats is only listed in the List for two sessions [0720 and 1920], but is regularly heard in other 'U' transmission slots. There could well be other stations to which this applies.

I'm sure there must be a historical reason behind this, but I have been unable to trace any formal documentation on stations only transmitting in reduced numbers of slots. Of course, the waters are muddied by the requirement for Navtex stations to make transmissions at any time when necessary. However, with a Navtex CLE coming up, would it be a good time to check the scheduled outputs of all coastal stations?

Best Wishes,
David GM8XBZ

Hi All,

No 518kHz report today. When I went to the log, the 518 stream had only gibberish. It comes from the same radio as the 490 stream, and is decoded by the same PC. After checking everything several times and getting nothing from local broadcasts, I closed that instance of YaND, and restarted it. Success! I don't know how I 'broke' that instance, and I foolishly failed to save the log-file. But all seems well, now. Is it possible to clog up YaND? I believed the log-file wrapped round when it got full. Regardless, here is a little bit of 490kHz

Session Report for David Atkins, GM8XBZ
Listening Location: Tighnabruaich, Argyll, IO75jv (55°54'18"N 005°14'07"W)
Report Created On Mar 19, 2015
Receiver(s): WinRadio Excalibur
Antenna(s): MiniWhip at 6m
Software: YaND; two instances

9830. pre-CLE log from Surrey, ENG

Yahoo group: navtexdx (2015)
Date: 2015-03-19 19:49:33 UTC
From: Brian Keyte
Topic: 9830 Message: 9830

After 2 years away from Navtex, these are my get-up-to-speed attempts, made over the last week or so.

There were lots of gale warnings from the NW Europe stations, often taking up their full time slots leaving no time for the distant whispers! Thankfully the weather at least has calmed down a bit now.

I hope the station names are OK - they'll need to be for harvesting of the CLE logs. I'm not sure of the correct names for some of my less DX stations because those reports are often omitted from most logs and they may not be consistently named in the various databases (any corrections welcomed).

After a start with the Frisnit decoder (NAVTEX_2.1.5 - easy peasy!) I again used SeaTTY and YaND running simultaneously on the same input.

The raw decodes for the over 3,000 km loggings (flagged #) are added at the end. Each of them is entirely from SeaTTY (unedited of course!).

Topic: 9398 Message: 9837

No DX to report. The stations that came through were solid copy and with many messages. The rest of the screens were completely garbled, with no way of identifying the sources.

Hello Dirk,
Thank you for the document. It was an interesting read.

There are two ways of interpreting the paragraph you selected [para 4.5].
Taking Cullercoats $01U as an example:-

Option A. The station will broadcast the Inshore Forecast at 0720 and at 1920. In the other timeslots, it might or might not broadcast Weather Actual Reports.

Option B. The station will broadcast the Inshore Forecast at 0720 and at 1920. In the other timeslots, it will include Weather actual Observations in the broadcast.

Because I have little choice but hear these stations when they are on air, to the exclusion of others that might be on air at the same time, I am confident in saying that Option B is a better fit to actual events.

Either way, it seems strange for the station list to exclude a station on the grounds that it is not transmitting a weather forecast. I think I must be missing a point, somewhere. Of course, I don't need the Station List to help me decide which station I might have received in those slots. They are so close that they completely exclude any others. But new listeners in different locations might be misled if there are arbitrary exclusions. And I hope there will be many new listeners during the upcoming CLE.

Kind Regards

David gm8xbz

Subject: Re: [navtexdx] Another YAND_STATIONS.TXT question [2 Attachments]

Hello David,

The time slots in Yand's database only mention the fixed daily Inshore Waters Forecasts.
The other slots may or may not be used: "Weather Actual Reports are broadcast once only at the next available broadcast schedule"

I have attached a copy of the MCA document where I found this info.
Maybe this is useful.

Regards - Dirk

Subject: [navtexdx] Another YAND_STATIONS.TXT question

Hello All,

Because we don't generally report local stations, it has taken me some time
to stumble upon this one.
490kHz 01C Portpatrick is only listed in two slots every day, 0820 and 2020.
I have seen a note somewhere that lists just theses two broadcasts but, as a
very local listener, I know that the 0020 slot is used daily to send a
lengthy weather report and forecast. It is about 8 minutes long, so might be
helpful for listeners wishing to add the station to the log. The station
also makes a lengthy transmission at 1220.

Similarly, 490kHz 01U Cullercoats is only listed in the List for two
sessions [0720 and 1920], but is regularly heard in other 'U' transmission
slots. There could well be other stations to which this applies.

I'm sure there must be a historical reason behind this, but I have been
unable to trace any formal documentation on stations only transmitting in
reduced numbers of slots. Of course, the waters are muddied by the
requirement for Navtex stations to make transmissions at any time when
necessary. However, with a Navtex CLE coming up, would it be a good time to
check the scheduled outputs of all coastal stations?

Best Wishes,
David GM8XBZ

9839. Navtex log from Antwerp,BEL 20150320

Hi all,
Still no sign of Bodo, but Vardo made it in the 4:10 time slot - although weak.Even Orlandet - normally quite strong here - is affected.Almost errorless decodes from the Eastern Med.
Regards - Dirk

Hi David,
The REU database also only lists the 2 time slots of the IW forecasts for Cullercoats, Niton and Portpatrick on 490.

A Navtex station that has no messages on hand in its fixed 4-hourly timeslot will always announce this ("no messages on hand for xxxxx"). Cullercoats/Niton/Portpatrick don't do this for their (potentially) 4 extra timeslots.
I think it is more confusing for a user to hear nothing in a listed time slot, than the other way around.After all, out-of schedule transmissions occur almost every day.

Kind regards - Dirk

Subject: RE: [navtexdx] Another YAND_STATIONS.TXT question

  Hello Dirk,
Thank you for the document. It was an interesting read.

There are two ways of interpreting the paragraph you selected [para 4.5].
Taking Cullercoats $01U as an example:-

Option A. The station will broadcast the Inshore Forecast at 0720 and at 1920. In the other timeslots, it might or might not broadcast Weather Actual Reports.

Option B. The station will broadcast the Inshore Forecast at 0720 and at 1920. In the other timeslots, it will include Weather actual Observations in the broadcast.

Because I have little choice but hear these stations when they are on air, to the exclusion of others that might be on air at the same time, I am confident in saying that Option B is a better fit to actual events.

Either way, it seems strange for the station list to exclude a station on the grounds that it is not transmitting a weather forecast. I think I must be missing a point, somewhere. Of course, I don't need the Station List to help me decide which station I might have received in those slots. They are so close that they completely exclude any others. But new listeners in different locations might be misled if there are arbitrary exclusions. And I hope there will be many new listeners during the upcoming CLE.

Kind Regards

David gm8xbz

Hello David,

The time slots in Yand's database only mention the fixed daily Inshore Waters Forecasts.
The other slots may or may not be used: "Weather Actual Reports are broadcast once only at the next available broadcast schedule"

I have attached a copy of the MCA document where I found this info.
Maybe this is useful.

Regards - Dirk

Subject: [navtexdx] Another YAND_STATIONS.TXT question

Hello All,

Because we don't generally report local stations, it has taken me some time
to stumble upon this one.
490kHz 01C Portpatrick is only listed in two slots every day, 0820 and 2020.
I have seen a note somewhere that lists just theses two broadcasts but, as a
very local listener, I know that the 0020 slot is used daily to send a
lengthy weather report and forecast. It is about 8 minutes long, so might be
helpful for listeners wishing to add the station to the log. The station
also makes a lengthy transmission at 1220.

Similarly, 490kHz 01U Cullercoats is only listed in the List for two sessions [0720 and 1920], but is regularly heard in other 'U' transmission
slots. There could well be other stations to which this applies.

I'm sure there must be a historical reason behind this, but I have been
unable to trace any formal documentation on stations only transmitting in

reduced numbers of slots. Of course, the waters are muddied by the requirement for Navtex stations to make transmissions at any time when
necessary. However, with a Navtex CLE coming up, would it be a good time to
check the scheduled outputs of all coastal stations?

Best Wishes,
David GM8XBZ

Hello all,

Bodo and Vardo are absent once more.
No 490 kHz log today, as apparently I have messed things up!

Daily log:

NAVTEX 518 kHz over 1500 km:

```

9846. Navtex log from Antwerp,BEL 20150321

Yahoo group: navtexdx (2015)
Date: 2015-03-21 19:00:21 UTC
From: Dirk Claessens
Topic: 9846 Message: 9846

Hello all,
Kyoto Dst is still very slowly recovering.Bodo/Vardo/Archangelsk absent in the logs.Grindavik is back at normal strength.
Regards - Dirk

Date: 2015-03-22 09:56:22 UTC
From: Dirk Claessens
Topic: 9848 Message: 9848

Hi all,
Shortest log in weeks.Only Vardo made it from the north.Grindavik 1X not seen in the log, I got 2X Valencia instead.Even Torshavn was affected, barely above the noise floor!

Regards - Dirk

From: david
Topic: 9398 Message: 9851

Possibly my shortest log, ever. Screensful of stuff from the locals, but it feels as though there is a force-field around me that cuts off dx signals;-)
This is all that made it:-

Session Report for David Atkins, GM8XBZ
Listening Location: Tighnabruaich, Argyll, SCT, IO75jv (55°54'18"N 005°14'07"W)
Report Created On Mar 22, 2015

9852. Oostende Navtex Mystery Message

Yahoo group: navtexdx (2015)
Date: 2015-03-22 13:11:21 UTC
From: david
Topic: 9852 Message: 9852

Hi All,

Amongst last night's local messages, I found the following. Although the copy was perfect, I can't understand what it means. Can someone explain it to me, please? My English teachers used to go on at length about the grammatically correct use of "due to". It can be used to mean "about to", or "because of", or "on account of". I never got it right, but none of those uses make sense of the message for me. Help.

Hello David,
The indicated messages could not be transmitted on 518 because the 10-minute time slot would be exceeded.The last messsage of Ostend T (yesterday) in the 03:10 slot ended at 03:19:48, close indeed.

I wish Cullercoats would do the same, they overrun their slot by 2 minutes almost daily.Example:2015-03-21 05:11:37 76> ZCZC GA59

Hi Dirk,

Thanks for the explanation. It makes sense, now. First time I've seen this sort of thing.
Of course, I'm very used to Malin Head starting early every day ;-) I thought that was just as bad.

Kind Regards
David

9857. Navtex Logs from W Scotland

Yahoo group: navtexdx (2015)
Date: 2015-03-23 15:45:14 UTC
From: david
Topic: 9398 Message: 9857

Just when I thought signals couldn't get any scarcer, I am proved optimistic.
I am just about equidistant from Rogaland (01L) and Niton (01E, 01K) -- around 680km -- but, although Niton continues to give regular copy, I can't even detect screen garbage for the Rogaland slots. I found one session from the north of me, from Jeloya 01M. Even though it is only 1000km away, I had to include it for its rarity value.

Session Report for David Atkins, GM8XBZ
Listening Location: Tighnabruaich, Argyll, SCT, IO75jv (55°54'18"N 005°14'07"W)
Report Created On Mar 23, 2015
Receiver(s): WinRadio Excalibur
Antenna(s): MiniWhip at 6m
Software: YaND; two instances
Report Sorted by Frequency and Time

Hello all,

Bodo and Vardo were received on 518 kHz, but Grindavik not.
On 490 kHz Grindavik was found in two time slots!

Daily log:

NAVTEX 490 kHz log over 1500 km:

```
20150321 1834 490 $03P SVK Kerkyra,GRC 1821

9865. Report from VE3EAR

Yahoo group: navtexdx (2015)
Date: 2015-03-24 13:00:45 UTC
From: John Bruce McCreath
Topic: 6963 Message: 9865

The blah conditions continue, with virtually no DX being decoded. San Juan, PR and Miami, FL, USA being the
furthest stations copied. I see it's much the same for you fellows on the other side of the Atlantic, too!

73, Bruce, VE3EAR

9866. Navtex logs from Whitley Bay, ENG

From: Dirk Claessens
Topic: 6963 Message: 9867

Hello Bruce,
Yes indeed, horrible solar max conditions.I wonder what the summer months will bring.
The Kyoto DST is very slowly recovering now...
Regards - Dirk

From: "John Bruce McCreath weazle@... [navtexdx]" <navtexdx@yahoogroups.com>
To: navtexdx@yahoogroups.com
Sent: Tuesday, March 24, 2015 2:00 PM
Subject: [navtexdx] Report from VE3EAR

The blah conditions continue, with virtually no DX being decoded. San Juan, PR and Miami, FL, USA being the
furthest stations copied. I see it's much the same for you fellows on the other side of the Atlantic, too!

73, Bruce, VE3EAR

Hi All,

A marginal improvement. Some Northerners beginning to reappear

Logs Editors: please note my ITU is SCT, and is incorrectly stated in REU

9870. NAVTEX CLE192 - FINAL DETAILS

Yahoo group: navtexdx (2015)
Date: 2015-03-24 20:30:48 UTC
From: Brian Keyte
Topic: 9870 Message: 9870

Hi all

Here are the final details for this weekend's co-ordinated listening event,
our 7th CLE dedicated to receiving Navtex stations.
Please read it carefully to avoid problems in using your log.

In this Event you can sleep through each night, knowing that the PC will
store details of your 'catches' for you to find at a civilised time!
Most Navtex Stations have service ranges of 250-400 nautical miles and
they can provide very good DX opportunities for our sensitive receivers.

Days: Friday 27 March - Tuesday 31 March
Times: Start and end at midday, your local time
QRG: 490kHz and 518 kHz (no other frequencies please)

Note the EXTRA 24 HOURS at the end.

Advice already sent about this Event is at http://www.ndblist.info/cle.htm
For FULL Navtex advice go to http://www.ndblist.info/datamodes.htm
All the Navtex information is in the lower part there:
Details are given of several good decoders which are freely available
including Dirk's excellent YaND and SeaTTY (free 30-day trial).
Alan's comprehensive WORLD NAVTEX DATABASE was recently updated.
Members' previous Navtex reports are included in REU/RNA/RWW.
Seeklists made from there, and other advice about the Event, can be found
from our CLE page, http://www.ndblist.info/cle.htm

Please send your CLE log to the List in a Plain Text email if possible. Use
'CLE192' in its title. Show these main log items FIRST on each log line:-

The date (or day No.) and UTC (the day changes at 00:00 UTC)
The nominal kHz (490 or 518)
The $--- call Ident. as shown in Rxx and in the World Database
E.g. $04R for San Juan, PTR. (After the $ is the 2-digit Navtex
Area No., then the Station's 'slot' letter that you received).

The station name (location) should go LATER in the same line, with
any other optional data such as distance, language used, etc.
WWSU supports the reporting of Navtex.
This weekend many of us will change 'local time' on our house clocks.
Do make sure that your shack and PC clocks continue to show UTC
TIME and are NOT changed.

CHECK ALL YOUR LOG ENTRIES. Make sure that each decoded
message has the as-transmitted Station letter and that each message
contains text confirming the identity of the Station you are showing.
The content of the message should be consistent with the 'slot' letter

that you received. If you are in ANY DOUBT about it, please flag it as a query and show a full copy of the raw message after your main list.

Please also include a copy of the raw decodes for any RARE DX and for any Station NEW to the Rxx Database. It is suggested that you could also do this for your 3 most DX loggings (not for ALL your loggings!)

As usual the combined results will show details of the decoders we used so please say which one(s) you ACTUALLY USED in the CLE, tell us your receiver and aerial details and, of course, your location.

Please send your log as you normally do - i.e. either to NDB List OR to NAVTEX DX List (please NOT to both Lists and not direct to me).
I shall take results from both Lists and I'll send the 'Any More Logs?' and the Combined Results, etc., to both Lists.

I will confirm the 'Final' logs that I have found at around 17:00 UTC on Wednesday, but do make sure that your log has arrived on the List by 08:00 UTC on Thursday 2nd April at the very latest.
I hope I shall be able to send all the combined results on that day.

Below are some bits of extra guidance that may help you to avoid problems and may answer some queries.

Good decoding!
Brian

From: Brian Keyte G3SIA ndbcle'at'gmail.com
Location: Surrey, SE England (CLE co-ordinator)

Please include only ONE logging of each station
i.e. Frequency + Area No. + 'Slot' letter.
(On 518 kHz, $01E Niton and $01K Niton are different Stations, as are $12J Kodiak and $12X Kodiak, etc.)

If you often switch frequencies it is important to KNOW THE TIMES that apply to each - it is easy to allocate a logging to the wrong frequency.

Various receiver settings work well with a fairly wide IF filter - e.g. USB with receiver set 1.0 kHz lower than the frequency of interest (to 489 for 490 kHz or to 517 for 518 kHz).
Or CW with receiver set to the actual Navtex frequency and BFO set to +1.0 kHz. Other offsets such as +1.5 kHz, +1.7 kHz, etc. could be used.

Listeners away from Europe may find they are short of target stations. Anyone may make a CLE log by remote use of a receiver (such as the one at Twente in Holland) provided that ALL THEIR LOGGINGS FOR THE CLE are made through that ONE receiver.
(see http://websdr.ewi.utwente.nl:8901/)

9871. Re: Pre-CLE log from Surrey, ENG

Yahoo group: navtexdx (2015)
Date: 2015-03-24 21:40:52 UTC
From: Brian Keyte
Topic: 9871 Message: 9871

I just discovered, to my horror, that my 'get up to speed' Navtex log that I sent last Thursday (19th March) gave all the log dates as 2013-03-- instead of 2015-03--.
I obviously most certainly was NOT up to speed!

It happened because the Access program to make my Navtex log, last used in 2013, was deliberately adding 2013-03 to the day number for every logging - correct then, but NOT NOW.
All the other details are OK.

I found the error this evening when about to forward the same log to NDB List as an example of a Navtex log - something not very often seen on their List. (NDB List members will be joining us in this weekend's Navtex CLE).

Vincent: please can you amend if/as needed on REU please? I'm so sorry.

73
Brian
(CLE Co-ordinator)

9874. Re: [navtexdx] RAW Log from SW Brazil

Yahoo group: navtexdx (2015)
Date: 2015-03-25 03:49:46 UTC
From: Marcus PY3CRX PY2PLL
Topic: 9873 Message: 9874

Hi Vernon ...

Another thing that’s possible is that UY and AG are sharing infrastructure ... cause the timeslot (0250 Z) belongs to L2B Buenos Aires.

Null one or another station from here doesn’t help much because both seems at the same azimuth from here.

9877. Navtex Logs from W Scotland

Yahoo group: navtexdx (2015)
Date: 2015-03-25 15:50:51 UTC
From: david
Topic: 9398 Message: 9877

Hi All,

Bodo and Vardo made it as far as Scotland, but they were fairly lonely signals. Stations of the Eastern half of the Mediterranean seem to be impossible for me.

Session Report for David Atkins, GM8XBZ
Listening Location: Tighnabruaich, SCT, IO75jv (55°54'18"N, 005°14'07"W)
Report Created On Mar 25, 2015
Receiver(s): WinRadio Excalibur
Antenna(s): MiniWhip at 6m
Software: YaND; two instances
Report Sorted by Frequency and Time

Logs Editors: please note my ITU is SCT, and is incorrectly stated in REU

Hi Brian,

Does your PC blocked on 2013 ?.....or your log is on 2015 ! HI

9886. NAVTEX from Zealand, HOL

Yahoo group: navtexdx (2015)
Date: 2015-03-26 19:37:28 UTC
From: roelof@...
Topic: 5534 Message: 9886

Hello all,

Since the geomagnetic storm on March 17, T/A propagation vanished. Last night and the night before I could log two Canadian NDB's for the first time since the event in what appeared to be a very weak pre-dawn enhancement.

So far nothing at all from NAVTEX Canada!

Daily log:

NAVTEX 490 kHz log over 1500 km:

```
20150325 2142 490 $01K TFA Grindavik,ISL 2045
20150325 2200 490 $03M EAV Cabo de la Nao,ESP 1497
20150325 2230 490 $03P SVK Kerkyra,GRC 1821
20150325 2239 490 $03Q SVH Irakleion,GRC 2529
20150325 2255 490 $03R SVL Limnos,GRC 2147
20150325 2340 490 $03W ICI Sellia Marina,ITA 1735
20150326 0157 490 $03L YQV Constanta,ROM 2027
20150326 0330 490 $03V 7TA Alger,ALG 1681
20150326 0509 490 $02G CTA Penalva,POR 1735
```

NAVTEX 518 kHz over 1500 km:

```
20150325 1923 518 $01U ESA Talinn,EST 1560
20150325 2139 518 $03K SVK Kerkyra,GRC 1821

Hi Brian,
Does your PC blocked on 2013 ?.....or your log is on 2015 ! HI

73 de Vincent F5OIH

Hi Vincent

I discovered my faux pas on Tuesday evening and I sent the following email to explain what had happened:
At the same time I sent the corrected log to NDB List as an example - I have copied that for you below.
('Only' the year entries were wrong).

Subject: [navtexdx] Re: Pre-CLE log from Surrey, ENG

I just discovered, to my horror, that my 'get up to speed' Navtex log that I sent last Thursday (19th March) gave all the log dates as 2013-03-- instead of 2015-03--.
I obviously most certainly was NOT up to speed!

It happened because the Access program to make my Navtex log, last used in 2013, was deliberately adding 2013-03 to the day number for every logging - correct then, but NOT NOW.
All the other details are OK.

I found the error this evening when about to forward the same log to NDB List as an example of a Navtex log - something not very often seen on their List. (NDB List members will be joining us in this weekend's Navtex CLE).

Vincent: please can you amend if/as needed on REU please? I'm so sorry.

73
Brian
(CLE Co-ordinator)

9890. Re: [navtexdx] Navtex log from Antwerp,BEL 20150326

Yahoo group: navtexdx (2015)
Date: 2015-03-26 21:57:41 UTC
From: roelof@...
Topic: 9887 Message: 9890

Hello Dirk,

This is kind of weird as I received 8 perfect decodes of Bodo in the
00:10 UTC time slot. Vardo came in nicely as well.

I guess you are just outside the favorite skip zone1

73,
Roelof

9891. NAVTEX from Les Alpes Maritimes FRA 27032015

It is getting better slowly, more and more stations from the North are making it. Nothing spectacular though.

From: david
Topic: 9398 Message: 9893

Getting better. Still a long way to go. At last, the propagation to the North seems to be coming back. Even Torshavn -- only 700km away -- has finally become a regular, again.
I see some really nice logs from others, and I am very glad it isn't a competition;-)
And a warm welcome back to Vincent!

9895. Navtex log from Antwerp,BEL 20150327

Yahoo group: navtexdx (2015)
Date: 2015-03-27 16:09:47 UTC
From: Dirk Claessens
Topic: 9895 Message: 9895

Hi all,
Propagation from the north has returned to normal, after 10 days.Bodo/Vardo still weak in the 20:10 time slot, normal at 00:10, again absent at 04:10, likely because of Alger. Even Arkhangelsk is back at full strength.Let's hope this continues during the CLE.
Regards - Dirk

9897. Mondolfo R. on 490 kHz in YaND Schedule

Yahoo group: navtexdx (2015)
Date: 2015-03-28 09:12:02 UTC
From: Roberto Rizzardi
Topic: 9897 Message: 9897

Hi all,

I use 490 kHz listening rarely, but in these CLE192 event days I use it too and I noted a time slot error in the Navtex Schedule on YaND software about Mondolfo Radio, even if the "E" slot is right, but 10 minutes earlier in the YaND schedule.

It is ok on the NAVTEXview software schedule.

73, Roby

9898. Navtex CLE192

Yahoo group: navtexdx (2015)
Date: 2015-03-28 12:19:33 UTC
From: Brian Keyte
Topic: 9898 Message: 9898

Just a reminder that many of us will be changing our house clocks tonight ('daylight saving').
Do make sure that your decoder will continue its logging in UTC.

Users of YaND should have no problem as the program ensures that all log times are UTC.
SeaTTY has an option box within Setup/Text "Use UTC time", which should be ticked.

Probably the best general advice is that users should not tamper with their clock settings, but ensure that the decoder is set to UTC where that option is available.

I hope you are happy with your results so far.
I was surprised to find one of my first decodes on 518 kHz yesterday, shortly before midday and the start of the CLE:

```
2015-03-27 11:27:15 41> ZCZC UA94
2015-03-27 11:27:18 44> 2711-0375: .-4 14
2015-03-27 11:27:20 39> MONDOLFO RADIN
2015-03-27 11:27:20 39>
2015-03-27 11:27:25 50> COASTAL WARNING NG. 097/15 FEB 27
2015-03-27 11:27:37 51> LIGURIAN SEA - LA SPEZIAU- INVHE AREA BOUNDEDCBY - - -
(etc.)
```

Strange conditions? Mondolfo is over 1,200 km away, almost all overland, and that must be one of my furthest midday Navtex loggings.

73
Brian

Good catch Brian!
This shows that you have a very good equipment and propagation is very strange in this season.

From: R.Connolly
Topic: 9897 Message: 9902

Hi

As I don't use Yand I cannot say what is in the navtex schedule file however time slot E for Mondolfo on 490 kHz is correct and the transmission times should be 0040, 0440, 0840, 1240 1640 and 2040 UTC.

Subject: [navtexdx] Mondolfo R. on 490 kHz in YaND Schedule

Hi all,

I use 490 kHz listening rarely, but in these CLE192 event days I use it too and I noted a time slot error in the Navtex Schedule on YaND software about Mondolfo Radio, even if the "E" slot is right, but 10 minutes earlier in the YaND schedule.

It is ok on the NAVTEXview software schedule.

As a related question, When does YaND use the YAND_STATIONSLIST file ?
Is it read once, at start up, and held in memory? Or is it read each time
YaND needs it? In other words, if I want to use a revised copy of the table,
do I have to restart YaND?

Kind Regards
David, gm8xbz

Propagation remains much the same. Lots of Storm and Gale warnings locally. That means even more transmissions from big local signals that mask the slots the DX might be hiding in.

A nice example, this morning, of Norway sending the same message in a series of transmissions from their group of stations.

Hi David,
The station file is only needed once to import the data into the database tables.After that it is not needed/used by Yand anymore.A restart is not needed, just click the "Import" button, and all tables and grids will be updated.

Regards - Dirk

Hi Brian,

I have upgraded your log.....in 2015 !

Back home tomorrow and will be on 518 KHz 0

Hello Dirk,

Once more interesting conditions.

Nothing from Turkey and Egypt here, but I logged Grindavik, Bodo, Vardo, Bjuroclubb the Azores and the Canary Islands!

73,
Roelof

9914. Saturday Night Propagation

Yahoo group: navtexdx (2015)
Date: 2015-03-29 02:36:42 UTC
From: " Vernon "
Topic: 9914 Message: 9914

Very poor conditions tonight. Worst this winter. Can hardly copy the Zone 4 regulars due to weaker than normal signals and a VERY high noise level.

Vernon

9915. Malin Head $01A - 490kHz, $01Q - 518kHz

Yahoo group: navtexdx (2015)
Date: 2015-03-29 08:50:17 UTC
From: david
Topic: 9915 Message: 9915

Hi all,

Malin Head is less than 150km from here, and usually an extremely strong signal. On Thursday/Friday, I saw several 'Test' transmissions from them out of their regular slots. But there has hardly been a signal from the station all weekend. At the beginning of their slot, I have seen a strong carrier for 10-15 seconds. That was always their practice, before going into the sync phase. But this weekend it has been followed by silence. I don't see any announcements on other stations. I though Valentia, at the very least, would have mentioned any changes. Does anyone have any information?

Best Wishes
David GM8XBZ

9916. NAVTEX CLE192 from Zealand, HOL

Hello all,

NAVTEX CLE, second entry, not final.

Excellent decodes of European NAVTEX stations due to poor DX conditions.

9917. Re: [navtexdx] Malin Head $01A - 490kHz, $01Q - 518kHz

Yahoo group: navtexdx (2015)
Date: 2015-03-29 09:19:48 UTC
From: roelof@...
Topic: 9915 Message: 9917

Hello David,

The last message received on 490 kHz from EJM is on Friday, March 27, 20:00 UTC.

I am monitoring 490 kHz and EJM does not seem to transmit a lot of messages. So far over March, the grand total is 27.
Between March 9 and 15, nothing was received here.

Some stations are sending "NO MESSAGE AT HAND" when there is none. However, I have yet to see this from EJM.

The strong carrier might just be a test transmission to check if everything is still working as it should.

73,
Roelof Bakker

From: baruffi53@...
Topic: 9919 Message: 9919

Here's some info on my station:

Robert J.Baruffi
4796 Jefferies Hwy
Walterboro, SC USA

Realistic DX-302 Antennae- Long Wire 280 feet and Dipole 148 feet total
Coordinates 32.966157 -80.641368
Grid EM92qx

Will be receiving shortly an MFJ Antenna Tuner for 300 khz to 30 mhz.

Been Dxing for 30 years but love NAVTEX. I have to try and eliminate all those UNIDs. I read the text and clearly able to determine the origin however. Can I ask what antenna set up you all use? Has anyone looked at the STORMWISE ANTM10 ?

Thanks again

9921. RE: [navtexdx] Malin Head $01A - 490kHz, $01Q - 518kHz

Yahoo group: navtexdx (2015)
Date: 2015-03-29 11:46:52 UTC
From: david
Topic: 9915 Message: 9921

Hi Roelof,

To answer my own question, they came back at 0640 this morning with a very low quality signal, and back to full strength at 1040. Perhaps someone kicked the ATU in the right place ;-)
Malin Head is in the same time-slot as Split (Q), and usually spoils my reception of those signals, even though they are still coming from Mondolfo.
I have had good signals from 'Split' for a couple of nights, but I suppose they will be mostly masked, again. My (short) experience has been different to yours. A quiet Malin Head seems very rare from this close range.

Best Wishes
David gm8xbz

Subject: Re: [navtexdx] Malin Head $01A - 490kHz, $01Q - 518kHz

Hello David,

The last message received on 490 kHz from EJM is on Friday, March 27, 20:00 UTC.

I am monitoring 490 kHz and EJM does not seem to transmit a lot of messages.
So far over March, the grand total is 27.
Between March 9 and 15, nothing was received here.

Some stations are sending "NO MESSAGE AT HAND" when there is none.
However, I have yet to see this from EJM.

The strong carrier might just be a test transmission to check if everything is still working as it should.

73,
Roelof Bakker

From: david
Topic: 9398 Message: 9923

Mostly the regulars.

I have been using the Excalibur to monitor Navtex because it will cover two signals at the same time, and send them through separate channels of a stereo cable. But that was the receiver's only saving grace, for me. I simply never got on with the rig or its software.
At last, I have got to grips with the Studio 1 software, and have managed to get it to do the same stereo trick. So I have been able to go back to the Perseus. Studio 1 takes some mastering and I have a long way to go. But already, I feel more comfortable. If only the electromagnetic flux would calm down a bit, I could do some real testing.

From: Dirk Claessens
Topic: 9919 Message: 9925

Hello Robert,
Welcome to the group!Most of us use the PA0RDT miniwhip and/or small (~1m) ALA-type loop antennas for LW/MW Dxing.From what I found on the internet, the Stormwise M10 is a 6.5 inch ferrite rod antenna.This is quite small and may work if mounted outside, but I wouldn't expect miraculous reception.

The PA0RDT miniwhip will outperform any wire antenna (*) on LW/MW but it must be mounted outside, away from noise sources inside the house.
(*) except beverage-type antennas or a full size 600m dipole :0)

Best regards - Dirk

Subject: [navtexdx] Thanks for the addition !

  Here's some info on my station:
Robert J.Baruffi4796 Jefferies HwyWalterboro, SC USA
Realistic DX-302 Antennae- Long Wire 280 feet and Dipole 148 feet total
| Coordinates 32.966157 -80.641368

| Grid EM92qx

Will be receiving shortly an MFJ Antenna Tuner for 300 khz to 30 mhz.

Been Dxing for 30 years but love NAVTEX. I have to try and eliminate all those UNIDs. I read the text and clearly able to determine the origin however. Can I ask what antenna set up you all use? Has anyone looked at the STORMWISE ANTM10 ?

Thanks again |

Hi David,

Like yourself I live about 160 km to the southeast of Malin Head however I have received the following transmissions since I started my monitoring session around midday on 27th using SeaTTY:

27th 1440, 1840, 2240

28th 0640 1040 1440

29th 0640 1040 and 1840

Robert GI7IVX

The home of NDB Dxing in Northern Ireland

Subject: [navtexdx] Malin Head $01A - 490kHz, $01Q - 518kHz

Hi all,

Malin Head is less than 150km from here, and usually an extremely strong signal. On Thursday/Friday, I saw several 'Test' transmissions from them out of their regular slots. But there has hardly been a signal from the station all weekend. At the beginning of their slot, I have seen a strong carrier for 10-15 seconds. That was always their practice, before going into the sync phase. But this weekend it has been followed by silence. I don't see any announcements on other stations. I though Valentia, at the very least, would have mentioned any changes. Does anyone have any information?

Best Wishes
David GM8XBZ

Poor conditions continue, only the "regulars" making it. Nothing new last night despite changing to a different directional loop.

From: david
Topic: 9915 Message: 9931

Thanks Robert. It was their overnight absences that I noticed, too. Those were the first slots I had seen them miss in several weeks. Not so long ago, I was complaining about Malin Head starting its transmissions more than two minutes early. There were also the 'false-starts' from a strong transmitter in their slot.
They seem to be back to full time and full strength, now. That will reduce my chances of logging 'Split', once again.

Best Wishes
David

9933. NAVTEX CLE192 from Zealand, HOL

Yahoo group: navtexdx (2015)
Date: 2015-03-30 14:20:03 UTC
From: roelof@...
Topic: 5534 Message: 9933

Hello all,

NAVTEX CLE, third entry, not final.

Two (scrambled) messages from VCO, Sydney, CAN were found on 518 kHz! Let us hope propagation will improve a little more before this CLE is over.

NAVTEX 490 kHz:

9935. Where is Boston?

Yahoo group: navtexdx (2015)
Date: 2015-03-30 15:57:24 UTC
From: John Bruce McCreath
Topic: 9935 Message: 9935

The Navtex station Boston, $04F, call sign NMF, has been conspicuous in its absence lately at my location. Has anyone else noticed this too, or is it just my problem?

73, Bruce, VE3EAR

9937. CLE192 Prelim #2 from Brier, WA

Yahoo group: navtexdx (2015)
Date: 2015-03-30 18:43:16 UTC
From: k7wv@...
Topic: 9937 Message: 9937

Definite improvement noted on the west coast of North America last night as well. NMN from Virginia in twice last night with good decodes. Still nothing from Miami or San Juan. This morning at dawn Japan was in with bits and pieces (including the distinctive "JAPAN NAVTEX" identifier preceding the broken message). It was soon wiped out by Kodiak at 13:30. Most likely it was Yokohama, heard many times before here. Hoping for additional improvement so some DX can be added to the CLE log. No 490 Khz here at all, only 518. I have decoded 424 Khz in the past with the Frisnit Navtex-J decoder but am monitoring 518 only for the CLE.

Session Report for Thomas Rothlisberger, K7WV
Listening Location: K7WV Brier WA, CN87ut
Report Created On Mar 30, 2015
Receiver(s): Perseus SDR
Antenna(s): Wellbrook ALA-100M using NW/SE wire loop
Software: YaND 6.4, WWSU

```

Hi Tom,

Logged NMA, NMN & San Juan here several times here. No NMF. Only 15 total. I too gave up on 490 - just noise - was hoping some South Americans would pop up. Might try 424 with Frinet - seems fairly sensitive but loses sync and prints a lot of rubbish sometimes.

More Radio Fun and a Whole Lot More!

Thanks, Don. I'll keep trying for NMA and San Juan as we have another night to go and things are improving.
Yes, the Frisnit decoder does print lines and lines of gibberish when not in sync. The decoded messages will be compact and have the same familiar look about them when properly received. There will be some English words and all times, coords and Message numbers will be in the familiar digits we are used to. Here is an example of what they look like properly decoded: http://www.qsl.net/k7wv/Navtex_JK.htm
http://www.qsl.net/k7wv/Navtex_JK.htm . It's been my experience that Frisnit Navtex-J is a bit less sensitive than YaND. If JA's are not coming in on 518 you will not get any decodes on 424 usually.

9940. RE: [navtexdx] Where is Boston?

Yahoo group: navtexdx (2015)
Date: 2015-03-30 21:24:09 UTC
From: billriches
Topic: 9935 Message: 9940

Hi Bruce,

Hearing it in Cape May, NJ

73,

Bill, WA2DVU

The Navtex station Boston, $04F, call sign NMF, has been conspicuous in its absence
lately at my location. Has anyone else noticed this too, or is it just my problem?

73, Bruce, VE3EAR

Bruce,
Boston logged for first time this CLE at 0450 UTC last night. $04F has always been scarce on
518 kHz. They spend most of their time running on the higher frequencies.

9944. CLE 192 Log from N.France

Yahoo group: navtexdx (2015)
Date: 2015-03-31 06:25:27 UTC
From: Jean Jacquemin
Topic: 9944 Message: 9944

Hi all,

Well, contrary to what one might think Navtex Dxing is definitely
not for lazzy listeners !!
...especially when the wind blows at 110 km/h and the ext antenna
has to be uninstalled in a hurry ;-(

Despite a rather disappointing log I enjoyed this Navtex CLE very much
and I'm looking forward to the next one !

A pity I've not yet solved my Perseusdll/ USB3/ W 8.1/ VAC problems
so I couldn't set up two instances on SDR-Radio and had to swap
between 490 and 518 :-((Next time I'll try recordings, though decoders
don't show the "real" time when reading them.

Sorry for the Navtex harvesters, I used the "NDB format" for date and
UTC. As a very casual Navtex listener, I didn't know there was a
different one, from what I see on preliminary reports.

9946. Navtex logs from W Scotland

Yahoo group: navtexdx (2015)
Date: 2015-03-31 09:53:32 UTC
From: david
Topic: 9578 Message: 9946

A scary night. The telescopic pole supporting the mini-whip was gyrating alarmingly in the gale- to storm-force winds. Fortunately, everything seemed to survive. And any Doppler effects were masked by the local RF noises.

Session Report for David Atkins, GM8XBZ

From: John Bruce McCreath
Topic: 9948 Message: 9948

```
This turned out to be my best logging of the CLE!
Even the elusive Boston put in an appearance.

From: Dirk Claessens
Topic: 9578 Message: 9950

Hi David,
I was less lucky, my 5 meter PVC pole for the whip has snapped this morning.The whip and the cables have luckily survived.
Regards - Dirk

Subject: [navtexdx] Navtex logs from W Scotland

A scary night. The telescopic pole supporting the mini-whip was gyrating alarmingly in the gale- to storm-force winds. Fortunately, everything seemed to survive. And any Doppler effects were masked by the local RF noises.

Hello Dirk,

Snapping of your mast sounds amazing, considering you live way from the coast.

For years I have used ex-army stackable 4-foot faber glass camouflage net poles.
(handy for testing mini-whips, but that's an other issue)
These have never failed and are free standing 5 m high here.

I have also a 5 meter mast of these on top of the roof supporting the feed point of my hf doublet.
This one is guyed of course.

These poles costs 3 for Euro 10.

73,
Roelof

9952. CLE192 TWN

From: hans@...
Topic: 9952 Message: 9952

Here my first ever contribution. I concentrated on 518 and heard most regular station. Caught two new entries for my list, so it was a good weekend. Setup: IC7200 + Jackson Harbor Press LW convertor + 12 m vertical. I used YaND running on Wine on my Kubuntu box and the entries with 0 km distance were not automatically identified by YaND. I also wrote an entry on the blog site amateurradio.com http://www.amateurradio.com/cle192-navtex-edition-report/ to promote this CLE. Any comments are appreciated. 73 de BX2ABT Hans in Taiwan

9953. RE: [navtexdx] Navtex logs from W Scotland

Yahoo group: navtexdx (2015)
Date: 2015-03-31 13:45:17 UTC
From: david
Topic: 9578 Message: 9953

Ouch!
I use a telescopic fishing pole. It is a 10m pole, but I only use the lower 6 sections. It is a cost-effective way of obtaining poles, but the top few sections are too flimsy to hold even a modest mini-whip in anything more than a light breeze. That is why I use the oversized pole.
It must have been an unusually stormy night for your location to suffer. I hope you are back to a full station soon.

Best Wishes
David gm8xbz

Hi David,

I was less lucky, my 5 meter PVC pole for the whip has snapped this morning. The whip and the cables have luckily survived.

Regards - Dirk

9955. NA-CLE 192 final report from Foristell, MO

Yahoo group: navtexdx (2015)
Date: 2015-03-31 14:29:22 UTC
From: PalmerRD@...
Topic: 9955 Message: 9955

CLE 192 final report
Dick Palmer W7KAM
340 America Street
Foristell, Missouri
Receiver: ICOM R-75
Antenna: Clifton Z1501 active, base up 25 foot, 10 foot whip
Software: SeaTTY 6.3
Receiver: Kenwood TS-440S
Antenna: G5RV full size dipole up 20 foot
Software: YAND 6.4
My Location:
38 degrees 51 minutes 31 seconds north
090 degrees 53 minutes 57 seconds west
EM48nu
Listening times, QNH, and conditions:
2015-03-28 0000-1200, 1020.6 and steady, fair propagation, some static
2015-03-29 0000-1200, 1025.3 and rising, fair propagation, some static
2015-03-30 0000-1200, 1015.2 and rising, fair propagation, some static
2015-03-31 2300-1300, 1015.2 and decreasing, fair propagation, quiet
17 stations logged. Nothing new last night. I didn’t see much difference

between the four nights, propagation wise. Not near as good as two weeks

ago. No real DX was recorded. Missing Alaska and Hawaii and not much
from the Maritimes. Nothing south of the USA border was even hinted at.
I was a little disappointed that the higher Navtex frequencies were not
included in
this CLE. It would have given me something to look for in the daytime
hours.
Something to consider for us land locked central USA listeners in the next

Navtex CLE. Thanks Brian for all your help and the follow up reports.

From: Dirk Claessens
Topic: 9578 Message: 9956

Hello Roelof,
The mast has been up for 5 years now, and has survived far more severe storms than the one today.It snapped at its weakest spot, just above the point at 2 mtrs where the guy wires are attached.
At that point I had made a hole of ~7cm long and ~2cm wide, so that a PL259 connector + coax could be slipped through, up to the whip. This isn't necessary any more now, as the second whip I got from you has a BNC connector. When I mounted the new whip, the old cable was kept plus a PL259 to BNC adapter.

Aah well...up to the DIY shop :0)
Regards - Dirk

Hello Dirk,
Snapping of your mast sounds amazing, considering you live way from the coast.
For years I have used ex-army stackable 4-foot faber glass camouflage net poles.(handy for testing mini-whips, but that's an other issue)These have never failed and are free standing 5 m high here.
I have also a 5 meter mast of these on top of the roof supporting the feed point of my hf doublet.This one is guyed of course.
These poles costs 3 for Euro 10. 73,Roelof

Also PVC becomes brittle rather quickly when exposed to the elements, mostly due to UV exposure. A heavy coat of latex paint will help.

Rich

9958. CLE192 Final REU Navtex log from Whitley Bay, ENG

Yahoo group: navtexdx (2015)
Date: 2015-03-31 15:49:58 UTC
From: Mike Thayne
Topic: 9958 Message: 9958

Hello All,

Generally poor conditions here throughout the weekend but improvement in propagation on the last (extra) night was spoilt by all the storm warnings being issued around the UK and North Sea, masking out chances of catching rare DX for me. Never mind, this Navtex CLE makes a good change from the normal and allows plenty of time to spend with family instead.
As always, my thanks to Brian for organising the event and also to Vincent for all the inputs made into REU database.

Mike Thayne, g3gms
Location: Whitley Bay, England, IO95gb
Receiver 490kHz: Afedri SDR net
Receiver 518kHz: Icom IC735
Decoder: YaND
Antenna 490kHz: Miniwhip PA0RDT circuit, 8m agl.
Antenna 518kHz: Wellbrook ALA100LN with 10m wire loop (2x3m, 2x2m).

9960. CLE 192 from Zealand, HOL, FINAL

Yahoo group: navtexdx (2015)
Date: 2015-03-31 17:06:55 UTC
From: roelof@...
Topic: 9960 Message: 9960

Hello all,

I have been monitoring NAVTEX 518 for a couple of years now and I can assure you that the current lack of propagation is unique. T/A reception uses to be the rule rather than the exception!

NAVTEX reception can also be a good propagation indicator and as such it has served me well. I don't expect great reception of Canadian NDB's, when Canadian NAVTEX is absent.

The CLE192 log:

NAVTEX 490 kHz:

9963. CLE192 - Full & Final Log

Yahoo group: navtexdx (2015)
Date: 2015-03-31 19:10:37 UTC
From: Alan Gale
Topic: 9963 Message: 9963

Hi All,

What a wild and wet weekend it was, and we even had some snow here as well. After last night's ferocious blast of wind, I was worried that my antennas would have been damaged, but thankfully they all stayed in place, which is more than I can say for my wheelie bins - it's not much fun having to chase them down the street in the early hours of the morning, especially when you can barely stay on your feet in such fierce conditions! :-D

Propagation was a bit disappointing, though it could just have been that there were so many additional Gale Warnings taking place that any distant stations were having problems getting through. I would have liked at least one T/A station, but sadly not a peep from any of the regulars this time.

9968. CLE192 Final from Brier, WA

Yahoo group: navtexdx (2015)
Date: 2015-03-31 23:58:51 UTC
From: k7wv@...
Topic: 9968 Message: 9968

A fun 4 nights of NAVTEX! Friday was lackluster, only 11 received. Saturday was the worst of the four. Sunday some improvement; NMN added and bits and pieces from Japan at dawn. Monday offered the best reception by far. NMA, NMR, NME added in the early evening. JNB and JGC at dawn. It was the bonus night that really made this a CLE to remember.

I have never had a decode on 490 Khz and after running on it all night prior to the CLE I didn't see much point. 424 was another matter, I think I could have pulled something in there this morning but it was not included in the CLE frequencies.

17 overall, which is not bad here on the Left Coast, running one radio with one instance of YaND and one antenna, the ALA-100M. I was really pleased to add the Japan DX to the CLE log this morning even though nothing new was decoded this time around. Thanks as always to Brian and the organizers for another successful CLE.

9970. Final CLE Log

Yahoo group: navtexdx (2015)
Date: 2015-04-01 12:56:51 UTC
From: wd3c@...
Topic: 9970 Message: 9970

Final CLE Log.

I have included 2 data sets at the bottom as I don't believe the Niton, ENG catches are correct. To me the

time seems off but I've not spent enough time coping NAVTEX to be sure. I deleted all the unids which were

mostly off schedule broadcast about navigation hazards and 2 unmanned sailboats floating adrift.

The Astoria, OR was a good catch and was verified with the data.

Radio and computer had a great time, I would just check on it a few times a day.

Log for CLE:

Rich Dalton, WD3C
Location: 39.711015 (39° 42' 39'' N) Longitude -75.789877 (75° 47' 23'' W)
Radio: Yaesu Ft-920
Antenna:80-6 meter OCFD at 40ft.
Software: YAND

From: dirk.claessens@...
Topic: 9578 Message: 9971

Hi all,

I discovered that the snapped (brown) PVC pipe had a wall thickness of only 1.2 mm, which is quite flimsy.
It is now replaced with a grey pipe of wall thickness 2.5 mm.

Regards - Dirk

Aah well...up to the DIY shop :0)

9972. Navtex Logs from W Scotland

From: david
Topic: 9398 Message: 9972

Hi All,

Still poor reception. 490kHz seemed particularly bad, for no apparent local reason. The channel is no noisier than 518kHz, here.

Vernon,

Thanks for the info. I was surprised by that catch that is why I looked at the data.

Rich

Hi Rich...the ZCZC E64 data at the bottom is actually $04E Charleston South Carolina...hope this helps.

Vernon

On 04/01/15 08:56 AM, "wd3c@aol.com [navtexdx]" <navtexdx@yahoogroups.com> wrote:

Final CLE Log.

I have included 2 data sets at the bottom as I don't believe the Niton, ENG catches are correct. To me the

time seems off but I've not spent enough time coping NAVTEX to be sure. I deleted all the unids which were

mostly off schedule broadcast about navigation hazards and 2 unmanned sailboats floating adrift.

The Astoria, OR was a good catch and was verified with the data.

Radio and computer had a great time, I would just check on it a few times a day.

Hello Rich,
What you received was NME Charleston.Yand was fooled into Niton because of the E-identifier and the keyword ENGLAND.
Sh*t happens...
Regards - Dirk

Final CLE Log.
I have included 2 data sets at the bottom as I don't believe the Niton, ENG catches are correct. To me the
time seems off but I've not spent enough time coping NAVTEX to be sure.

Subject: CLE Problems!

Hi Alan The gremlins have got ME this time!Around 2 a.m. yesterday quite a big tree from the woodland fell acrossthe front side of the house. It damaged a section of tiles, fascia, guttersetc. and fell to the ground. Insurance Cos are involved - mine and thewoodland owners. It cut my phone line / Broadband. BT were due to come here yesterdayafternoon but didn't.Even if they restore the line today (Wednesday) the CLE results will bedelayed a bit. Otherwise I'll go over to Sue on Thursday and hope tobring back all the later-arriving logs on memory stick. Then I'll be ableto do all the processing off-line here, hopefully sending the combinedresults out from here, or again via Sue's Broadband if necessary. Please could you look out for anyone needing help - answers to mostquestions are usually in the Final Details! If I haven't surfaced by 17:00 UTC today (Wednesday) please could yousend apologies to both lists and explain why the 'Any More Logs' andthe combined results will be delayed. Do hope you're OK up there - and with real mains power again by now. 73
Brian ----------Please could you also relay my CLE log to NDB List for me: CLE192 Final from Surrey,
ENG---------- As in CLE168, I again used SeaTTY and YaND running simultaneouslyon the same input. The main feature this time was the extreme number and length of weatherforecasts for W Europe, squeezing out the weaker, more distant signals.My raw log file shows around 80 references to 'Storm Force 10' and analmost uncountable number of 'Severe Gale Force 9's.I did a first count of this on Monday evening - just before a big tree fellacross the side of my house! As well as significant damage to the house,it disconnected two of my aerials and cut the phone/broadband linewhen it 'bounced' to the ground! The raw decodes for the three most DX, flagged #, are at the end.They were each chopped, I think, by strong local stations.(Each is entirely from SeaTTY or entirely from YaND). dd UTC kHz Station Location Cou

Dirk,

Thanks, I read up on the manual after I installed the program and saw a bit about how it works and I suspected the same thing. I'm also glad FLDIGI kept crashing sending me at the last minute to find something else to use.

Unfortunately, I did not read the part first about installing in the correct folder, so had to extract the log into a txt file and edit by hand.. not that big deal I did it at work and got paid for it.

Thanks for the software it's quite amazing.

Rich

9980. CLE192 - ANY MORE LOGS?

Yahoo group: navtexdx (2015)
Date: 2015-04-01 21:29:03 UTC
From: Brian Keyte
Topic: 9980 Message: 9980

Hello all

Thank you for your CLE192 Navtex logs.

Below is my list of the logs found so far, in approximate arrival order.
Please check carefully that your log is included.

Do make sure that any remaining Final log has arrived on the List
by 08:00 UTC tomorrow (Thursday) at the latest.

The list combines Europe and 'Rest of the World' logs this time.
I apologise for the delay in sending it, for the reasons that Dirk
relayed in the 'CLE Problems!' email earlier.
I can only access the Internet and receive/send emails while away
from home at present. That's likely to remain for several days
- our phone repair services are not good!

By bringing my Broadband router and laptop here ('Sue's place'),
I now have all (?) the CLE logs downloaded and copied ready for
all the analysis which I can do off-line back at home.
I will need to come here again in the morning in case there are
any late logs.

I hope to complete the Combined Results by Friday, posting them
from here. There may be a few imperfections as I shall not be
able to make any Internet enquiries to resolve problems.

73
Brian

9981. Lost but Found

Yahoo group: navtexdx (2015)
Date: 2015-04-01 23:46:04 UTC
From: " Vernon "
Topic: 9981 Message: 9981

I was comparing my NAVTEX WWSU log with RNA and couldn't understand why there was a difference. Then I noticed that I had $09B logged on March 7, 2007 but it didn't show in RNA. I knew that I had submitted it to the list as it was quite a catch for me.

Tonight I went back through the NDB messages from March of 2007 and searched under $09B and there it was as message 16657 with comments from fellow listers.

If everyone is OK with this I would ask our Navtex gatekeeper to enter this into RNA .

I have pasted the supporting data below.

Many thanks..

Vernon

Hi Vern,

That's an outstanding catch, even from Europe Bahrain is good going! The
propagation seemed to be very one-way though, I couldn't hear a
thing from
your side of the pond at all last night.

Perhaps the folks who are saying we are probably at solar minimum
right now
are correct, that's certainly the sort of thing we should be
expecting at
this stage anyway. I reckon that must be pushing the 10,000 km mark from
your location. Our turn tonight I hope!:-)

73 for now, Alan.

Hi Vern,

WoW! OK with me. AFAIK we are on the honor system here so lets do some Dxing! You should be monitoring 410 kHz with that nearby ship grounding as well.

More Radio Fun and a Whole Lot More!

9983. Navtex log from Antwerp,BEL 20150402

Yahoo group: navtexdx (2015)
Date: 2015-04-02 12:27:35 UTC
From: Dirk Claessens
Topic: 9983 Message: 9983

Hi all.
More strange propagation patterns.Arkhangelsk was logged in 2 time slots, but absolutely nothing from Bodo and Vardo.Grindavik OK, Saudanes weak and scattered.Odessa is a rare guest here, just barely identifiable.
Regards - Dirk

9984. Navtex Logs from W Scotland

Yahoo group: navtexdx (2015)
Date: 2015-04-02 13:16:35 UTC
From: david
Topic: 9398 Message: 9984

No time to go through the UNID's, but there doesn't seem to be any real improvement in reception out here in the west. Archangelsk has never made it. The Norwegians are mostly back, although Bodo was missing once more. I'm hoping there will be a final spell of stunning propagation, before the summer sets in.

Session Report for David Atkins, GM8XBZ

Topic: 9983 Message: 9985

Hello Dirk,

It appears that La Maddalena was off on 518 kHz.
I received a lot of messages from CTA Penalva,POR.

There was also a lot of co-channel interference.
Your Saudanes was hidden here in this message:

From: Dirk Claessens
Topic: 9983 Message: 9987

Hello Roelof,
I can't make heads or tails of it these last months...It's as if the signals propagate selectively into multiple scattered areas, causing widely varying reception reports, even for propagation paths within Europe.
Also worth noting is that 490 has been even worse than 518. What 28 KHz can do.

Regards - Dirk

  Hello Dirk,

It appears that La Maddalena was off on 518 kHz.
I received a lot of messages from CTA Penalva,POR.

There was also a lot of co-channel interference.
Your Saudanes was hidden here in this message:

[...]

Splendid copy of Bodo and Vardo, but only one message from
Archangelsk. Go figure!

From: roelof@...
Topic: 9983 Message: 9989

Hello Dirk,

>>> Also worth noting is that 490 has been even worse than 518. What 28 KHz can do. <<<

Maybe the this is caused by multiple NDB carriers on 490 kHz and some of these are not just exact on also 490.000 kHz!

It is hard to believe that at a time it was rare here not to decode all three Egypt NAVTEX stations every night. So, it is not only T/A reception that suffers.

73,
Roelof

9990. Re: [navtexdx] Navtex log from Antwerp,BEL 20150402

Hi Roelof,
Yes, the NDB carriers on 490 are annoying, but they have been there for quite some time. Speaking of NDB's, what has also struck me is the almost total absence of ARD on 518 this winter.For years in a row now, it has been quite strong here all winter long, and was a general indicator for favorable conditions from the east. This winter I have only seldom seen/heard it.
Regards - Dirk

9991. NAVTEX CLE192 - Combined Results?

Yahoo group: navtexdx (2015)
Date: 2015-04-02 23:22:38 UTC
From: Brian Keyte
Topic: 9991 Message: 9991
Attachments: 1 described; binary payloads are missing from this source WARC

It's time I gave a mini-report on my progress - or lack of it - in making the listening event's combined results.

As you maybe read, a tree in the adjacent woodland fell across the front of my house in a storm early on Tuesday morning (picture attached). It hit the edge of the roof just above the bedroom window and 'bounced' down to rest over my boundary fence, bringing one of my aerials with it (which appears in the picture to be supporting it!). It cut my telephone line leaving me without any email/Internet/Broadband facilities.

I managed to download all the later CLE logs by taking my laptop and router on two trips to Sue, 8km away.

Fortunately a BT telephone engineer turned up here at midday today, a few days earlier than we had expected. He replaced the line, so I am back in full operation and again able to resolve problems in harvesting the logs by contacting the reporters or by making various on-line enquiries.
Several reporters sent multiple reports on many of their Stations and it is also taking a while to identify and remove all of them.

I am still hoping to finish making the Combined Results late tomorrow (Friday), with luck.

Thanks for your patience!

73

From: Dirk Claessens
Topic: 9993 Message: 9993

Hi all,
Slightly improved conditions, Bodo/Vardo signals returned to normal, albeit it only in one time slot.
Regards - Dirk

9997. NAVTEX CLE192 - RESULTS

Yahoo group: navtexdx (2015)
Date: 2015-04-03 17:26:35 UTC
From: Brian Keyte
Topic: 9997 Message: 9997
Attachments: 1 described; binary payloads are missing from this source WARC

Hi all

Our 192nd Co-ordinated Listening Event last weekend was dedicated
to decoding the Naxtex signals on 490 and 518 kHz.
Here are the combined results tables for ALL reporters, attached as
CLE192e5.xls. Soon they will also be available from the CLE page
via www.ndblist.info/cle.htm

36 Reporters
62 Radio Countries logged
138 Navtex Stations logged
1,223 reports - reduced to 1,170 after removing duplicates

It was good to get first-time CLE logs from Rich (MD) and Bruce (ON).

Most Logged:

EUROPE Stations:

```
Rprts kHz C/S Location Cou.
=============================================
19 518 $01T Oostende BEL

18 518 $01S Pinneberg Hamburg DEU
18 518 $03W La Garde (Toulon) FRA
18 518 $03U Mondolfo R ITA
18 518 $03R La Maddalena R SAR

17 518 $01V Oostende BEL
17 518 $01K Niton ENG
17 518 $01P Den Helder HOL
17 518 $03V Sellia Marina R ITA
17 518 $01M Jeloya NOR
17 518 $01J Gislovshammer Karlskrona SWE
```

REST of the WORLD Stations:

```
Rprts kHz C/S Location Cou.
=============================================
16 518 $04R San Juan (Isabella) PTR

15 518 $04G New Orleans USA

13 518 $04A Miami USA
13 518 $04N Portsmouth / Chesapeake USA
```

10 518 $04C Riviere-au-Renard (Sept Iles) CAN
10 518 $04F Boston (Cape Cod) USA

9 518 $04H Prescott CAN
9 518 $12W Astoria USA
9 518 $04E Charleston USA

(Missing Stations? and New Stations?

Producing these two lists is defeating me at present!
Best not to delay sending the rest, as I have other things I must do this evening and tomorrow morning. The 'log changes' details to affected reporters are to follow later too.)

DX30 +30 lists:
(The 30 furthest Stations logged, plus the 30 nearest)

km miles from kHz C/S Location Cou.

(If I don't have an accurate Lat./Long. for some listeners, their distances above may be a few km in error. Also, a few Station locations are not known with high accuracy.)

I hope to send a few co-ordinator's comments in a day or so.
This has been a difficult event to 'harvest' - I'm hoping nothing has gone too badly wrong in these results!
The number of reporters means that some of the Excel tables are extra wide and may be a little difficult to view.

Good listening
Brian

Hello Brian,
Thanks for posting the CLE results, in the midst of sorting out the storm damage!

Regards - Dirk

10002. NAVTEX from Zealand, HOL

Yahoo group: navtexdx (2015)
Date: 2015-04-04 12:18:27 UTC
From: roelof@...
Topic: 5534 Message: 10002

Hello all,

Just for a change, I am reporting all decodes over 1500 km.
Albeit propagation could be (much) better, band noise is very low at
the moment and this results is excellent decodes.

NAVTEX 490 kHz over 1500 km:

From: david
Topic: 9398 Message: 10004

Hi All,

As Roelof has pointed out, LF conditions are taking a long time to recover. However. I am grateful for any minor improvements.
I had a total lack of decodes on 490kHz before 2300. No amount of 'adjusting' of the receive or decode settings seemed to make any difference, but signals reappeared at 2300 at the sort of levels that I have come to expect. As others have noted, 490kHz seems to produce poorer signals. I wonder if it is because stations are using an antenna that is optimised for 518kHz. I can't see 4% making that much difference, but it is another straw to clutch at ;-)

Session Report for David Atkins, GM8XBZ
Listening Location: Tighnabruaich, SCT, IO75jv (55°54'18"N, 005°14'07"W)
Report Created On April 4, 2015
Receiver(s): Perseus
Antenna(s): MiniWhip at 6m
Software: Studio 1; YaND 6.4 - two instances

10005. Mini Whip

Yahoo group: navtexdx (2015)
Date: 2015-04-04 15:12:09 UTC
From: wd3c@...
Topic: 10005 Message: 10005

During the Navtex CLE I was putting the finishing touches on a mini whip. It will be interesting to see if I can hear more stations on Navtex/NDB etc.. once I have it installed and compare it to the CLE data.

And since it seems they are very popular here and where the designer lives, or at least spends a fair amount of time, I figure this is the place to post a few questions.

Should I increase the size of the whip or just use whats on the circuit board?

Should I limit the run of coax (8X or 213?) to a certain length. Location is pretty quiet already, both radio and otherwise, but would like to get it away from the house a bit.

Grounding?

Height above ground

And anything else I did not think of?

Rich

Rich,

As the amplifier is build in, coax length is not an issue.
I have had reports from people using up to 100m and at LF losses
will be small.

My antenna is 5 meter up and the band noise on a quiet band is 10-15
dB stronger than the receiver noise floor. So there is quite a bit
of leeway.

Regarding 'antenna' size, if you double the size, signal levels will
increase only 3 dB; 30 x 40 mm is about optimum and a good
compromise between strong signal handling and signal to noise ratio.

Increasing height gives more signals, but signal to noise ratio will
stay the same, so nothing is gained.

73,
Roelof, pa0rdt

10007. Re: NAVTEX CLE192 - RESULTS

Hi all

Here now is the advice about Missing? and New? Navtex Stations, the part that had been delayed in the rest of the results that I sent yesterday.

Missing Stations?

There were no 490 / 518 kHz Stations with 6 or more loggings in our 6th Navtex CLE (March 2013) and not reported by anyone this time.

New Stations?

The following list shows Stations with 6 or more loggings this time, but not reported in the similar event in March 2013.
The list searched only for matches on the frequency and the Ident (e.g. 490 + $01A).

```
Then Now kHz C/S Cou Location
=====================================
0 13 518 $01W IRL Valentia
0 7 518 $02P MDR Porto Santo (CENCOMAR)
0 11 518 $19C NOR Vardo R
```

Maybe someone (Dirk, Roelof, Alan, Don, .. .) can explain more about those three.

73
Brian
(CLE Co-ordinator)

From: Dirk Claessens
Topic: 9997 Message: 10008

Hello Brian,
-Porto Santo,MDR is "new", my earliest logging from the station was in January 2013. It is not daily logged in Europe though, so it could have been missed by all in the 2013 CLE.(by the way, CENCOMAR is not part of the station name, it is short for Centro de Comunicações da Marinha. 2F Sao Miguel,AZR uses CENCOMARACORES in most of its messages, a very unique keyword)
-Valentia,IRL: I can only speak for my QTH: 3W Lagarde in the same time slot is quite strong at night and Valentia will only have a chance when La Garde is not using up the entire slot.(Could there have been a mixup with Valencia,ESP??)

- Vardo: far up north, man vanish for several days, depending on conditions.
Regards - Dirk

```
Then Now kHz C/S Cou Location

Hello Brian,

First of all I hope that the damage to your house will be repaired soon. In the the next two years, the city of Flushing will be removing all "soft" trees (e.g. poplars) for the same reason what happened to your home: they are aiming to avoid future claims due to falling trees on municipal property.

Regarding Valentia, IRL, I do receive it almost every day, but not in all nightly time slots. It depends on (lack of) co-channel interference from La Garde FRA.

Regarding VARDO, I believe that the range has been upgraded as it is received here daily, except for a short time in summer.

73,
Roelof Bakker

Hello All,

Conditions of course are now much better than our CLE weekend. All Turkey stations going strong.
Traces of "Eastport Me to Cape Cod" shown in UNID (maybe NMF?) otherwise nothing from T/A.
Lots of strings of messages with perfect copy from Vardo, Suez, Greece and Turkey.

Mike Thayne, g3gms
Location : Whitley Bay, England,IO95gb
Receiver : Icom 735
Computer : Dual CPU 2.2Ghz
Decoder : YaND 6_4
Antenna : Wellbrook ALA100LN with 10m wire loop (2x3m, 2x2m).

As usual, conditions are picking up after the CLE ;-(
It is noticeable that the 'in-betweeners' -- those stations that are not real DX, but are often only found as partial decodes -- are becoming much stronger. I haven't advanced to the T/A stage, yet, but it was good to see a totally solid copy from Archangelsk. That is a very rare catch for me.

Dear NAVTEX Group,

I'm getting a lot of UNIDS. Can someone please tell me how to download the Unique and Geographical keywords the group has accumulated ? Please be very specific and detailed. I can't seem to understand the process.

Thank you

Robert

Hi Robert,
Welcome to the group.
The latest station database update is available in the Files section of this group.You need the file yand_stations.txt; a detailed explanation of the update procedure is available in the readme.txt file in the same directory. A user manual in PDF-format is also available there.

link to this directory:
https://groups.yahoo.com/neo/groups/navtexdx/files/Navtex%20Software/YAND%20Navtex%20%20Decoder/

Regards - Dirk

10021. NAVTEX CLE192 - Co-ordinator's Comments

Yahoo group: navtexdx (2015)
Date: 2015-04-06 22:44:57 UTC
From: Brian Keyte
Topic: 10021 Message: 10021

NAVTEX CLE192 - SOMETHING DIFFERENT?
Our Co-ordinated Listening Event during the last weekend in March was our 7th dedicated to receiving messages for shipping (navigational and meteorological warnings and forecasts) from the Navtex stations worldwide. Some of us were trying Navtex decoding for the first time, maybe also using a decoder program for the first time. It was also a chance for some Navtex enthusiasts to try out co-ordinated listening for the first time.
This is something that we do every two years or so. With 36 of us taking part, we were just one less than the record number of 37 two years ago.
Over the years we have tried several different ways of covering Navtex in our CLEs - a different numbers of nights, different choices from the range of frequencies, tackling the frequencies in two CLEs over separate weekends, etc. Each has pros and cons and I'm not sure that we've found the best way yet.

CONDITIONS
Also near to the sunspot maximum, this Navtex CLE again coincided with poor propagation. Roelof, who has been monitoring Navtex on 518 kHz for a couple of years assures us that the lack of propagation was unique (He commented that Navtex reception can also be a good propagation indicator and as such it has served him well.)
However we were listening from 27 different radio countries and messages were decoded from five Stations over 9,000 km away (5,600 miles) by reporters far apart from each other in NH, WA and TA.
Conditions were not helped for Europe listeners because of the extra stormy conditions with long weather forecasts which continued for most of the weekend and filled many of the 10-minute slots.
Most listeners away from Europe had their usual disadvantage of relatively few stations within likely range of them.

DECODERS
The table shows the number of users of the various decoders in our last three Navtex events.

CLE	March	SeaTTY	YaND	Other	not stated
141	2011	22	1	8	4
168	2013	10	24	6	4
192	2015	10	26	4	2

Clearly, Dirk's excellent YaND decoder very quickly became the preferred choice, with SeaTTY also remaining popular. Multipsk is the main 'other' choice.

MESSAGES
Our thanks to the reporters who included raw decodes from their most DX Stations.
Some of the more unusual messages received by listeners were:

"MYDAY ALERT 18 METER SAILINGVESSEL MAGNGS ZAREMBA CS SPG3930 CAPSIZED BROKEN MAST IN POS. 60-08.3.N 003-36.70E 5POB ROGALAND RADIO AND JRCC STAVANGER COORDINATING ... "
"COAST GUARD RECEIVED A REPORT OF A 12 FT BLUE/WHITE PARTIALLY SUBMERGED KAYAK DRIFTING 10

NM WSW OF LA AU POINT, MOLOKAI ... "
"CYPRUS TURKISH RADIO ILLEGAL STATION USING E ID..."
"ALL BE ADVISED THAT THE NAVIGATIONAL WNG FA15 BROADCASTED BY ANTALYA RADIO IS ILLEGAL ... "
"TUGBOAT CAPSIZED IN 41-45N 140-44E AT 270610UTC. CREW WENT MISSING. ..."
"THE BLAST DANGER AREA IS ACTIVATED IN CONJUNCTION WITH ROCKET MOTOR TESTING AND IS A HAZARD WITHIN THE LISTEDCOORDINATES. ... "
"ONE PASSENGER FELL OVERBOARD FROM FERRY ISHIKARI... "

WHAT's NEXT?
For NAVTEX Lovers: If you are ONLY a member of NDB List, I'm sure Dirk and Roelof would be pleased to see your request to join the Navtexdx List (just send an email to: navtexdx-subscribe@yahoogroups.com)
For CLE Lovers: If you are ONLY a member of Navtexdx List and you are interested in NDB logging, with or without CLEs, Alan would be pleased to see your request to join the NDB List (just send an email to: ndblist-subscribe@yahoogroups.com)

Our next monthly CLE No.193 for NDB List members (searching for normal NDBs), will probably be over the weekend of April 24 - 27 with early advice the weekend before it.
The May Event will probably also be over the last weekend of the month.

AND FINALLY:
Many thanks to everyone for their logs and for the care they took in making them. Our thanks to Alan for all he does for us in the http://www.ndblist.info/ Website.
And of course, to Vincent, for his work on the Navtex input to Rxx.

I am leaving the last word to Hans who sent his first Navtex CLE log this time and made these comments in a blog:

"I like NAVTEX for several reasons. It's an open format, easily decodable and messages are mostly in plain English. Then it's just like fishing with a fish pod: you can leave your setup on over night and in the morning see what nice DX you have caught. - - - - The last reason I like NAVTEX is the content being broadcast. It provides a window on a world that most of us don't know much about. Most messages are warnings about military exercises, weather reports and changes in locations of buoys, etc. But occasionally you see distress messages and then you realize how much hardship and suffering there is out at sea and how mighty it is."

Good Listening
Brian

From: wd3c@...
Topic: 10021 Message: 10022

Brian,

Read the bottom of your message and I'm surprised at the number of sailboats that are floating around with no one on board. If there was a storm I could understand it. This weekend a NAVTEX reported a 45 FT sailing yacht several hundred miles off the Carolina (US) coast with no one on board. Makes me wonder. In addition to the one they found the fellow on who had been missing for 66 days.

I looked up the 45 FT yacht and it was built in about 1905 and was available for charter and had been in the same family all those years. Not something you would just turn loose in the middle of the ocean.

10023. NT log for April 3/6 2015

-----------------------------------------------------------------
20150405 0351 518 $04X VOK Labrador ,CAN 2104 [JUL-OCT]
20150405 0652 518 $04R NMR San Juan,PTR 2509
20150405 0751 518 $04X VOK Labrador ,CAN 2104 [JUL-OCT]
20150405 0751 518 $04X VOK Labrador ,CAN 2104 [JUL-OCT]
20150405 0800 518 $04A NMA Miami,USA 1640
20150405 0900 518 $04G NMG New Orleans,USA 1694
```

Just a few listed as most were just locals. San Juan is one I did not copy during the CLE and VOK I'm pretty sure is new also.

I heard on the news about a guy found on a sailboat off the N. Carolina coast had been missing for 66 days. While looking at the messages I came across his boat listed. Now its just a navigation hazard.

10032. RNA Navtex - Onslow Nova Scotia

Yahoo group: navtexdx (2015)
Date: 2015-04-08 13:27:15 UTC
From: " Vernon "
Topic: 10032 Message: 10032

A few TA's over night. Nothing from the South or West. Also so far this year I have had only one partial message from South America and none from the West Coast. Very poor conditions for sure.

I really think that not having the 600' E/W long wire in place this year has hurt my TA Navtex reception as it was also much better than the loops for RX in poor conditions.

Vernon

From: roelof@...
Topic: 5534 Message: 10037

Hello all,

Conditions are slowly recovering.
I found four decodes from VCO, Sydney, CAN.
However, nothing yet from NMR, Puorto Rico!

NAVTEX 490 kHz over 1500 km:

20150408 1850 490 $03R SVL Limnos,GRC 2147

From: bob.blodge@...
Topic: 5534 Message: 10041

Hi All,

Not been "on the air" recently due to a slight health problem !

Having read all the gloom in most of the recent reports, I decided

to make the effort !

Last night was not too bad, these are my 2K s

20150408 1955 518 $09X SUZ Ismailia,EGY 3544

20150408 2008 518 $01B LGP Bodo,NOR 2029

20150408 2021 518 $19C LGV Vardo,NOR 2756

20150408 2051 518 $03F TAL Antalya,TUR 2966

20150408 2126 518 $02I EAL Las Palmas,CNR 2693

20150408 2143 518 $03K SVK Kerkyra,GRC 2031

20150408 2152 518 $03L SVL Limnos,GRC 2402

20150408 2203 518 $03M 5BA Cyprus,CYP 3235

20150408 2220 518 $03O 9HD Malta,MLT 2090

20150408 2230 518 $02P CTQ Porto Santo,MDR 2255

20150408 2230 518 $03P 4XO Haifa,ISR 3567

20150408 2350 518 $03W UJB Astrakhan,RUS 3611

20150408 2352 518 $01X TFA Grindavik,ISL 1951

20150409 0009 518 $01B LGP Bodo,NOR 2029

20150409 0021 518 $19C LGV Vardo,NOR 2756

20150409 0035 518 $03D TAH Istanbul,TUR 2490

20150409 0110 518 $03H SVH Irakleion,GRC 2751

20150409 0135 518 $03J LZW Varna,BUL 2294

20150409 0156 518 $20L UGE Arkhangelsk,RUS 2836

20150409 0220 518 $03O 9HD Malta,MLT 2090

20150409 0245 518 $04Q VCO Sydney,CAN 4281 X 5 !!

20150409 0528 518 $02P CTQ Porto Santo,MDR 2255

This was having changed from my usual LSB to USB, I don't

think that this made any difference !

Still using the old long wire but when I feel a bit more energetic I have

an active rod that I have re-built and might try that again.

Regards

Bob

From: roelof@...
Topic: 5534 Message: 10044

Hello all,

The Kyoto Dst rose yetserday eveing to 20+, which often does not bode well. Shortly after it started to drop like a stone to -43. It is still hovering around -40. I guess good condition are gone and will not recovering for a while!

NAVTEX 490 kHz over 1500 km:

As Roelof pointed out, things are starting to look poor, again. Time to start designing and building all those 'killer accessories' to use next season. Meanwhile, these are the best I could find.

From: Mike Thayne
Topic: 6159 Message: 10047

A suppressed band indeed. Very few UNID's indicating a lack of conflict between overlapping transmissions.

Mike Thayne, g3gms

Dirk, Roelof and all

Time for me to unsubscribe again until the next Navtex CLE.
Many thanks for the help you gave me during CLE192.

All the best
Brian

10053. YaNQ -- Yet Another Novice Question

Yahoo group: navtexdx (2015)
Date: 2015-04-11 09:06:46 UTC
From: david
Topic: 10053 Message: 10053

Hello All,
[But probably mostly for Dirk]

I run two instances of YaND, and have developed an issue on one of them. When I switch from the 'Spectrum' tab to the 'Log' tab, the message bar remains showing 'Schedule' rather than changing to 'Message Time Slot'. It stays like this, no matter which of the log entries I select, with the message bar giving the Scheduled transmissions for the present clock time. It updates as the clock moves on to the next time slot, but does not follow the highlighted entry in my log.
Is there a way of getting the Message Time Slot information back, short of re-booting this instance of YaND?

Allied to that, is there a way of 'Exporting' my Log? Or 'Exporting' my database? I believe the Log is cleared if I reboot, although I do realise the database remains.

While I am asking basic questions:- when I select the lowest displayed entry in the log to go into a Report [by clicking on the leftmost column], the listing often "jams". I cannot scroll down to a subsequent entry, without first scrolling UP to another entry. The programme will then let me scroll back down and on to subsequent lines. What am I doing wrong, here?
{Supplementary evidence - when this happens, the datebox I clicked seems to have a heavier highlight than boxes that are selected further up the log listing.}

Thanks for any hints,

David

Hi Roelof,

We have a quotation "Ignorance is Bliss".
We get it from an 18th century poem. In full, it should be, "Where ignorance is bliss, 'tis folly to be wise". I think the Dutch is more punchy.

And you are absolutely right - don't look at Kyoto ;-)

Best Wishes
David

Hello David,

Thank you for the explanation.
"Ignorance is Bliss" is nice too!
However, which way you look at it, we have to wait and sit these
ongoing poor propagation out.

However, the beauty with this hobby is that it has many facets.
My main interest has always been receivers.
Today I picked up an immaculate EKD-500 receiver.
(don't take this too literally as it weights 25 kg).
It is a wonderful receiver, stocked with superb mechanical filters
at 200 kHz.

73,
Roelof Bakker

10057. Re: [navtexdx] YaNQ -- Yet Another Novice Question

Hello David,
Most of what you describe is "behaviour as designed".-Switching to the Log tab does nothing by itself.-Only clicking (or Shift+clicking) a message will show the Message Time Slot info on the lower message bar. Further clicking of other messages (or scrolling through the list) in the log will update message time slot info.
-Switching to any other tab will automatically revert to Schedule info.
I'm unsure what you mean by "exporting the log". The database IS the log, it is never cleared, unless the user does so with the various options on the database tab.Reports (made by shift+click on selected records) can be exported, either to file or to the clipboard for further processing. The only way to export the database as a whole to Excel is from dbmanager.exe, but this will only work on systems that have a full MS Office suite installed.
Regarding the "lowest displayed entry". When this is also the LAST entry in the log database, then it is indeed impossible to further scroll down.
Also note that scrolling up/down the log records can be done in 3 ways - as in any Windows application:- with the up/down arrow keys of the keyboard,
- by dragging the scroll bar at the right,- with scroll wheel of the mouseA 4th way - specifically for Yand - is to use the left/right arrow buttons on the Database Navigation panel.
If I have misunderstood your questions, please let me know.
Regards - Dirk

Hi David, Roelof,
Yet another variation is John Cleese in the Fawlty Towers series where Cleese is hissing "Don't mention the war!"Change that to "Don't mention Kyoto!" :0)

From: david
Topic: 10053 Message: 10060

Hi Dirk,
Thanks for the reply. I didn't explain the situation properly.
I cannot get the Message Time Slot bar to appear by doing any of the actions you list. It remains the Schedule bar, based on the present time, not the selected entry. This only happens to the one instance of YaND. The other one is working 'as designed'.
If I re-launch this instance of YaND, I believe the Log will be lost. That is what I was hoping to preserve. {I know the database is safe, but don't know how to recreate the log, which I use as a reference source}.
The refusal to scroll down happens (sometimes) when I click on the lowest visible entry in the table window. There are other entries after that one, but I have to scroll UP, before I am able to scroll down to subsequent entries.

I hope that explains what I am trying to describe. It is difficult without waving hands about ;-)

Best Wishes
David

Subject: Re: [navtexdx] YaNQ -- Yet Another Novice Question

Hello David,

Most of what you describe is "behaviour as designed".
-Switching to the Log tab does nothing by itself.
-Only clicking (or Shift+clicking) a message will show the Message Time Slot info on the lower message bar. Further clicking of other messages (or scrolling through the list) in the log will update message t ime slot info.

-Switching to any other tab will automatically revert to Schedule info.

I'm unsure what you mean by "exporting the log". The database IS the log, it is never cleared, unless the user does so with the various options on the database tab.
Reports (made by shift+click on selected records) can be exported, either to file or to the clipboard for further processing. The only way to export the database as a whole to Excel is from dbmanager.exe, but this will only work on systems that have a full MS Office suite installed.

Regarding the "lowest displayed entry". When this is also the LAST entry in the log database, then it is indeed impossible to further scroll down.

Also note that scrolling up/down the log records can be done in 3 ways - as in any Windows application:
- with the up/down arrow keys of the keyboard,

- by dragging the scroll bar at the right,
- with scroll wheel of the mouse
A 4th way - specifically for Yand - is to use the left/right arrow buttons on the Database Navigation panel.

If I have misunderstood your questions, please let me know.

Regards - Dirk

Hi David,
I'm suspecting that the 2 instances of Yand are somehow conflicting.This can only happen when one or both were not installed properly.
-What is the OS version? If it is Vista/W7/W8, Yand should NOT be installed anywhere under ../Program Files(x86)/. This is the default install path the installer will offer, and is guaranteed to give all sorts of weird problems.

-Regardless of the OS version, both instances should be installed in separate directories.(C:/Yand1, C:/Yand2, c:/whatever/Yand1, the installer will give a chance to change the path)
-What may give a hint is to check Yand's system log: start up both instances, and post the contents of the system logs here.

- Please explain what you mean by "preserving the Log", and how it is recreated? (is it a Report perhaps?)
Regards - Dirk

Hi all,
Kyoto/Kp have recovered quickly, but sunspot number is still in bad territory.
Regards - Dirk
